QA Remediation Report

American Tire Stores Online Store

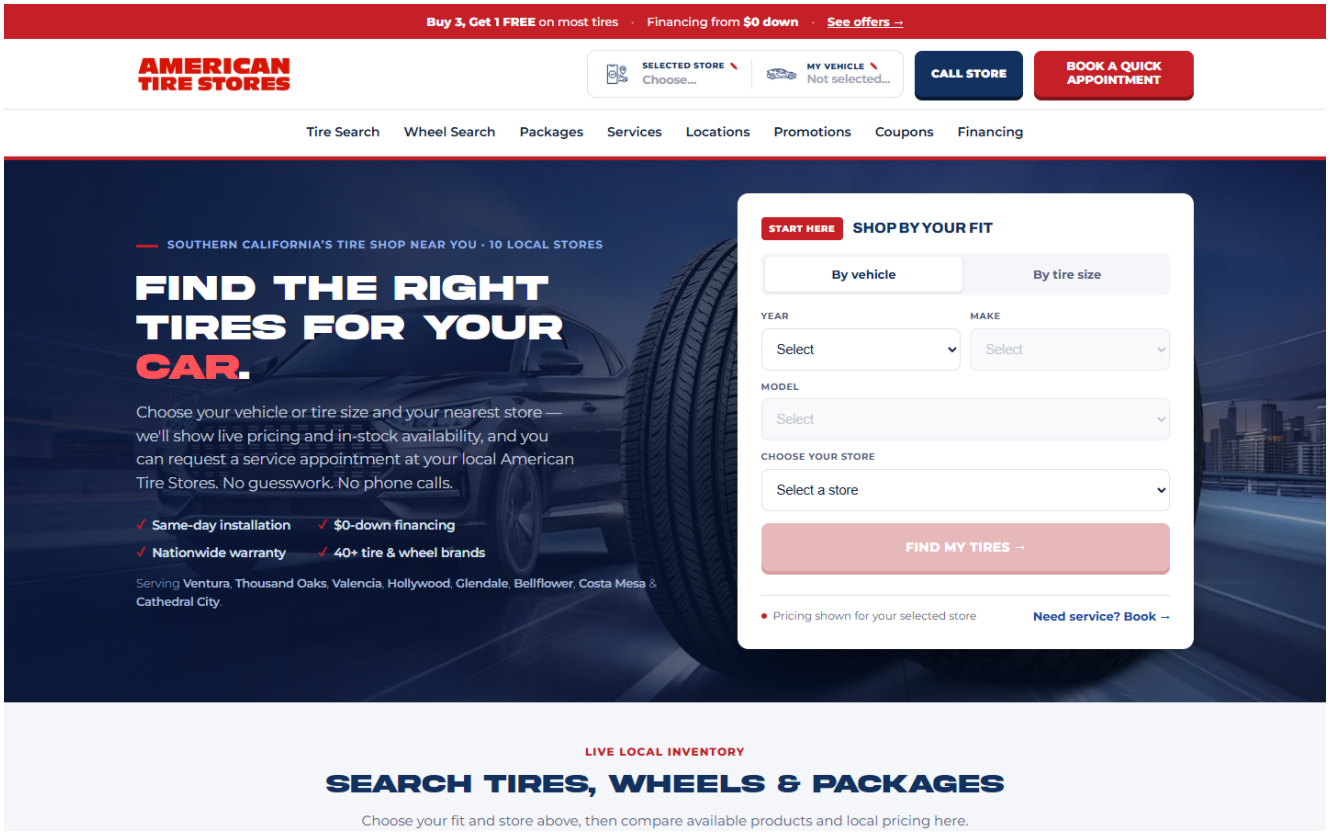

Scope and status

This report responds to each page-level concern in the supplied QA documentation. Theme changes were committed and pushed to **main** in commit **055019f**. The implementation standardises state sharing, TireConnect entry points, location data, the four-action store CTA, footer content, and responsive layouts.

Every issue entry includes a current storefront screenshot beneath its response. Screenshots are grouped by the live page and viewport relevant to the concern; repeated issues on the same page use the same verified current capture.

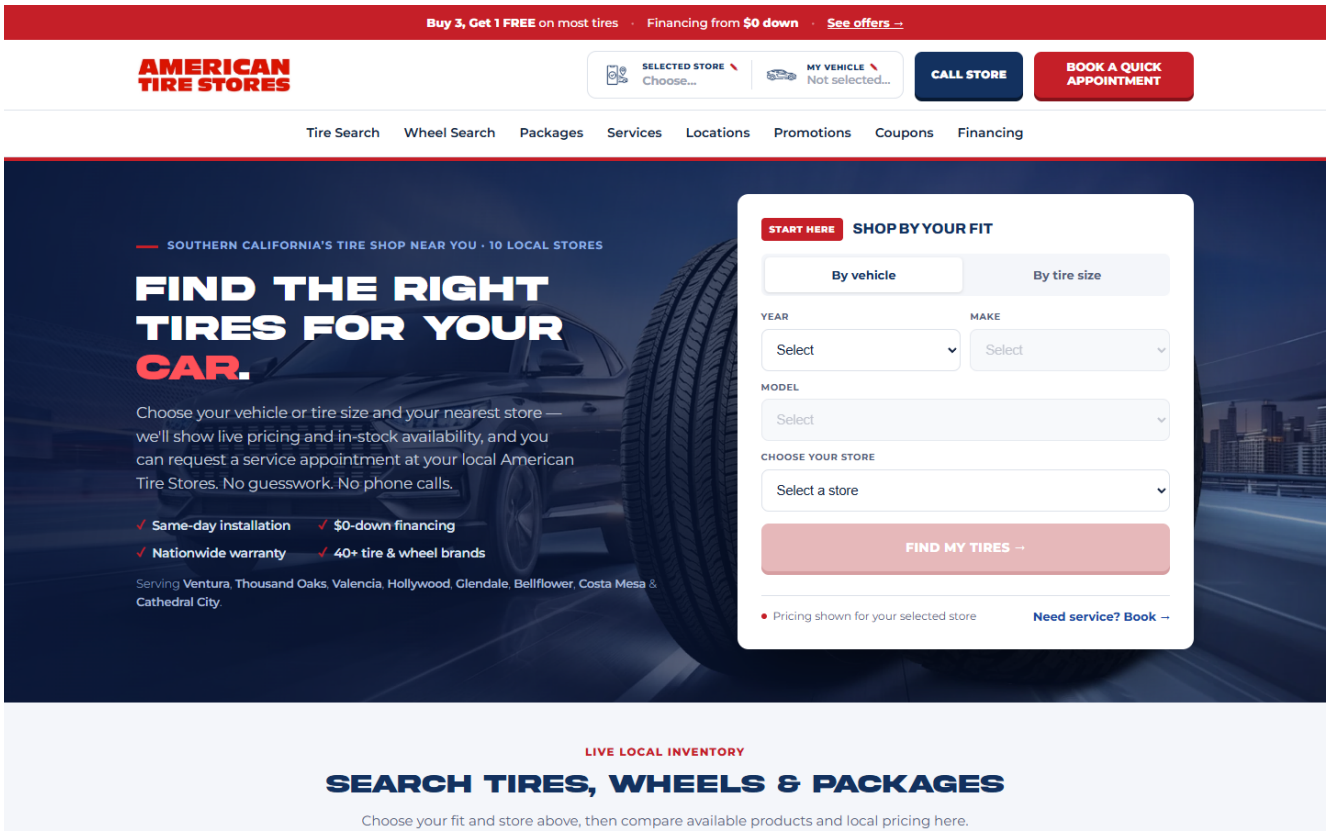

QA page 1: Header state	Complete
Shared selected-store state now drives Call Store, vehicle context, and the Services booking handoff. Mobile actions use their own non-overlapping row.	Post-fix screenshot below

Post-fix capture - Home Desktop

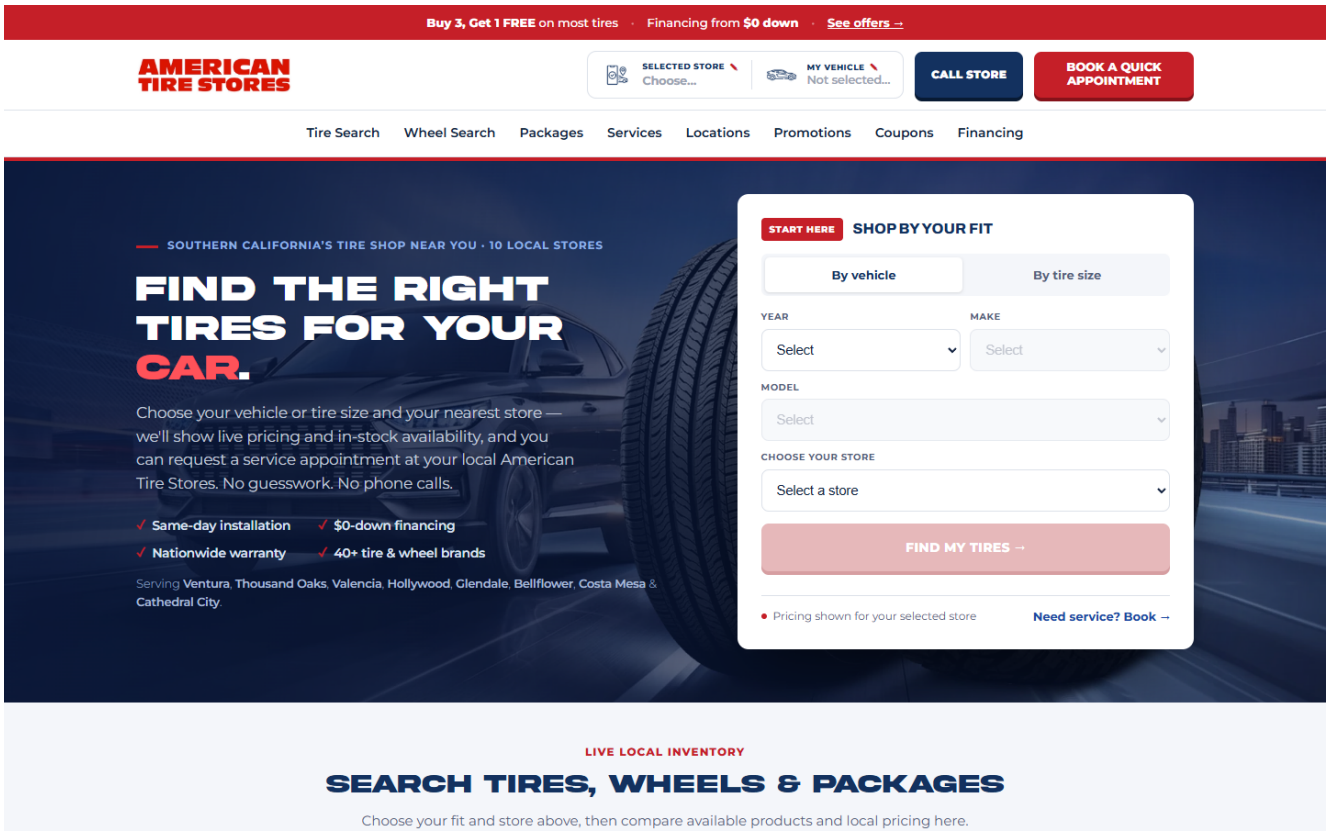

QA page 2: Homepage TireConnect	Complete
The homepage mounts TireConnect on initial load in its fixed search section; the hero search refreshes that same mount.	Post-fix screenshot below

Post-fix capture - Home Desktop

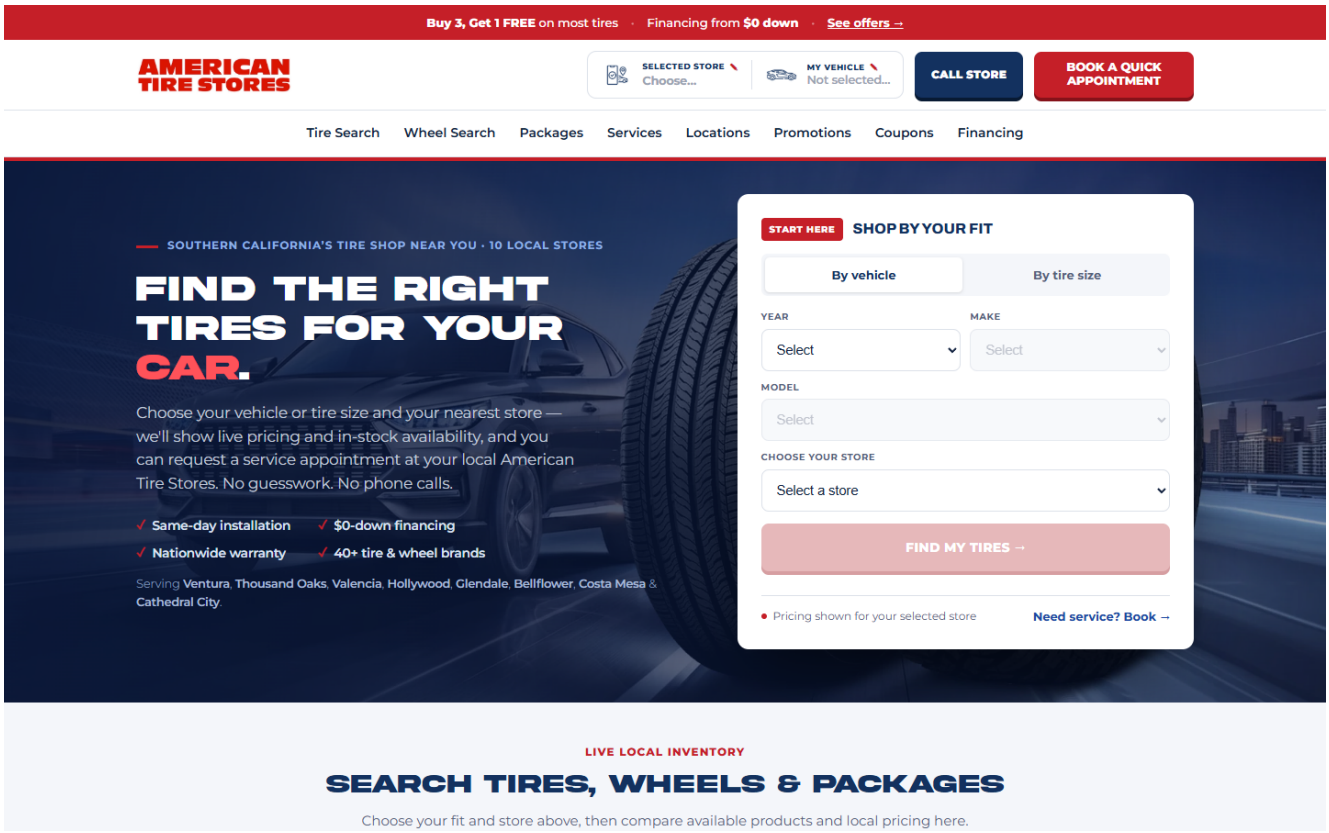

QA page 3: Service booking	Complete
Quick Appointment routes to Services booking and preserves available store and vehicle context.	Post-fix screenshot below

Post-fix capture - Home Desktop

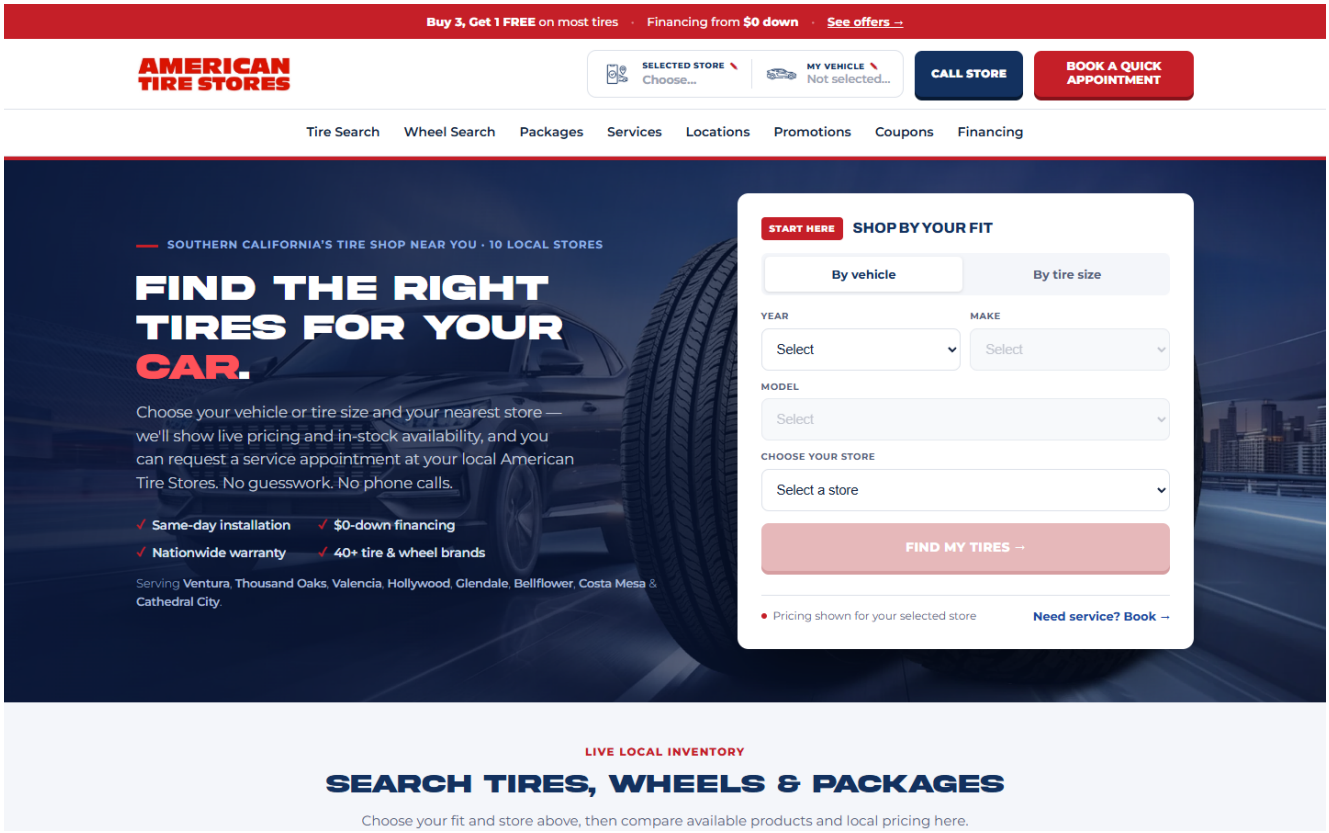

QA page 4: Homepage tire CTA	Complete
Find My Tires now opens the persistent homepage TireConnect mount instead of creating a conditional search instance.	Post-fix screenshot below

Post-fix capture - Home Desktop

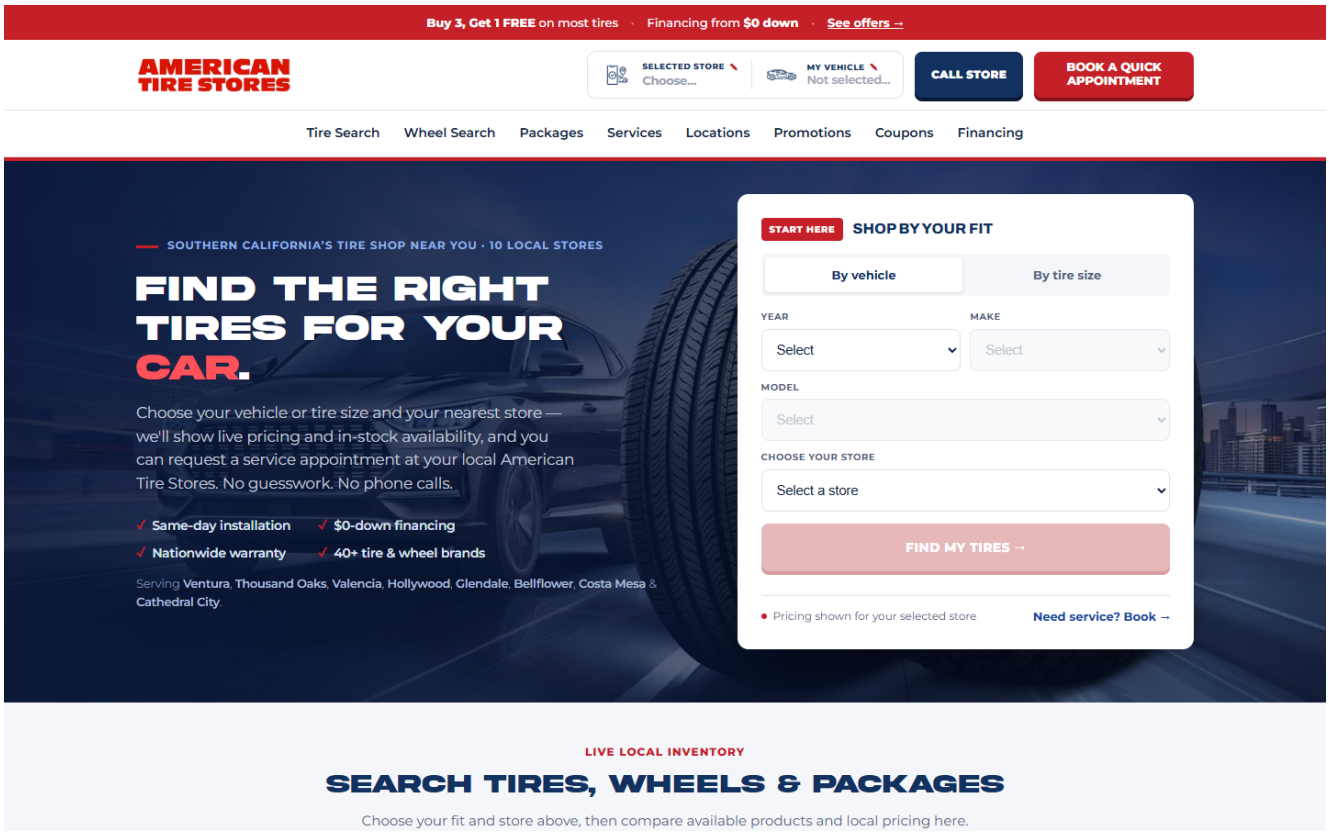

QA page 5: Service-card destinations	Complete
Service card images and detail actions use their corresponding service-page URLs.	Post-fix screenshot below

Post-fix capture - Home Desktop

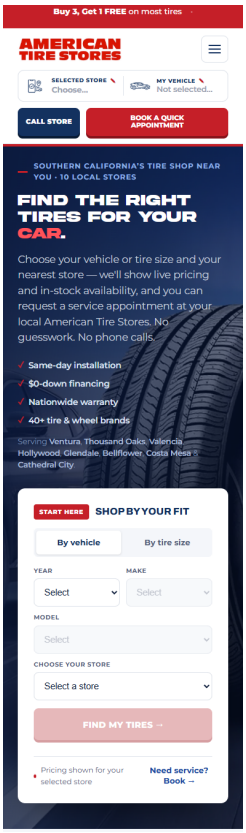

QA page 6: Location list	Complete
Customer-facing grids include ten active locations, including Downey, while Signal Hill remains Coming Soon.	Post-fix screenshot below

Post-fix capture - Home Desktop

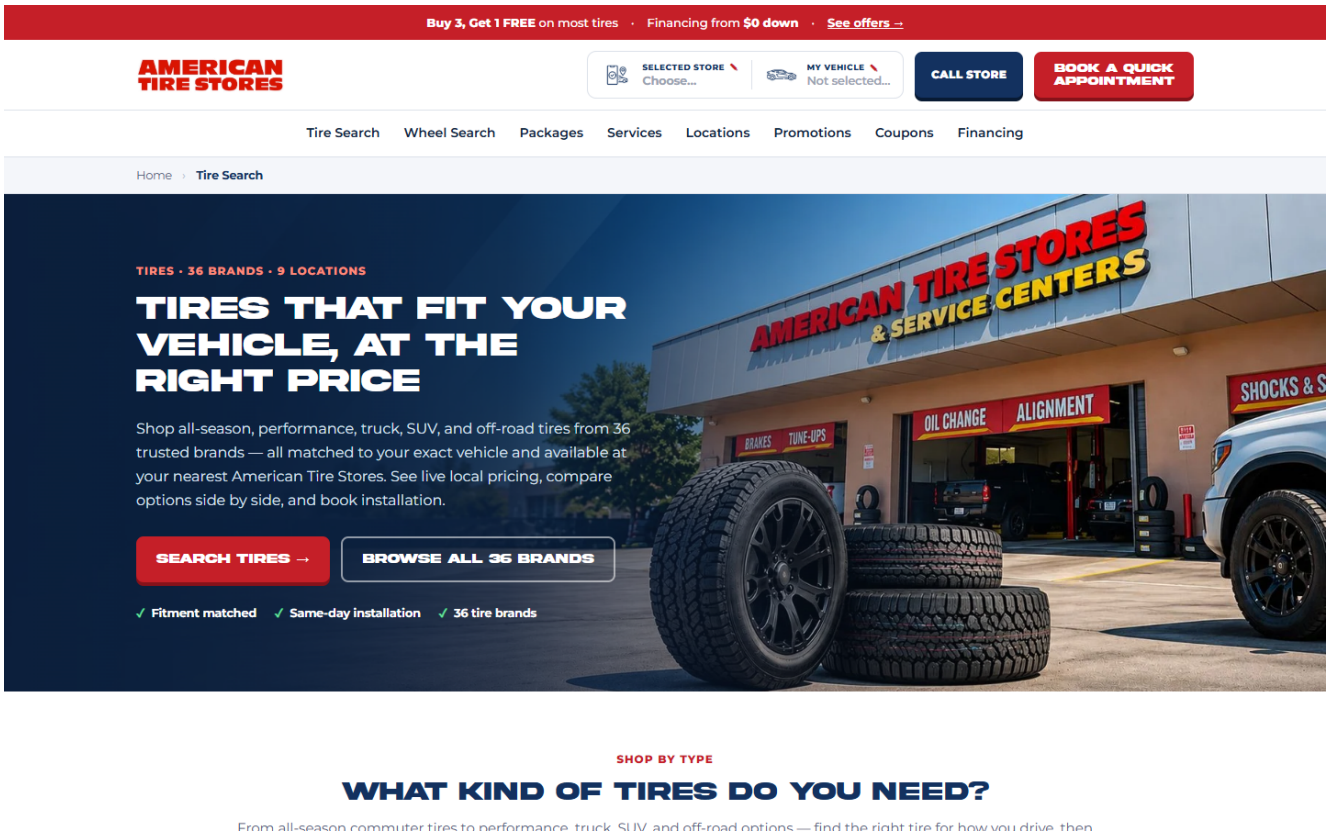

QA page 7: Mobile footer rail	Complete
The location-page mobile sticky Book/Find rail is removed; footer CTA spacing is normalised.	Post-fix screenshot below

Post-fix capture - Home Mobile

QA page 8: Tire Search tab	Complete
Tire Search keeps TireConnect configured for tire products and removes exposed implementation notes.	Post-fix screenshot below

Post-fix capture - Tire Search Desktop

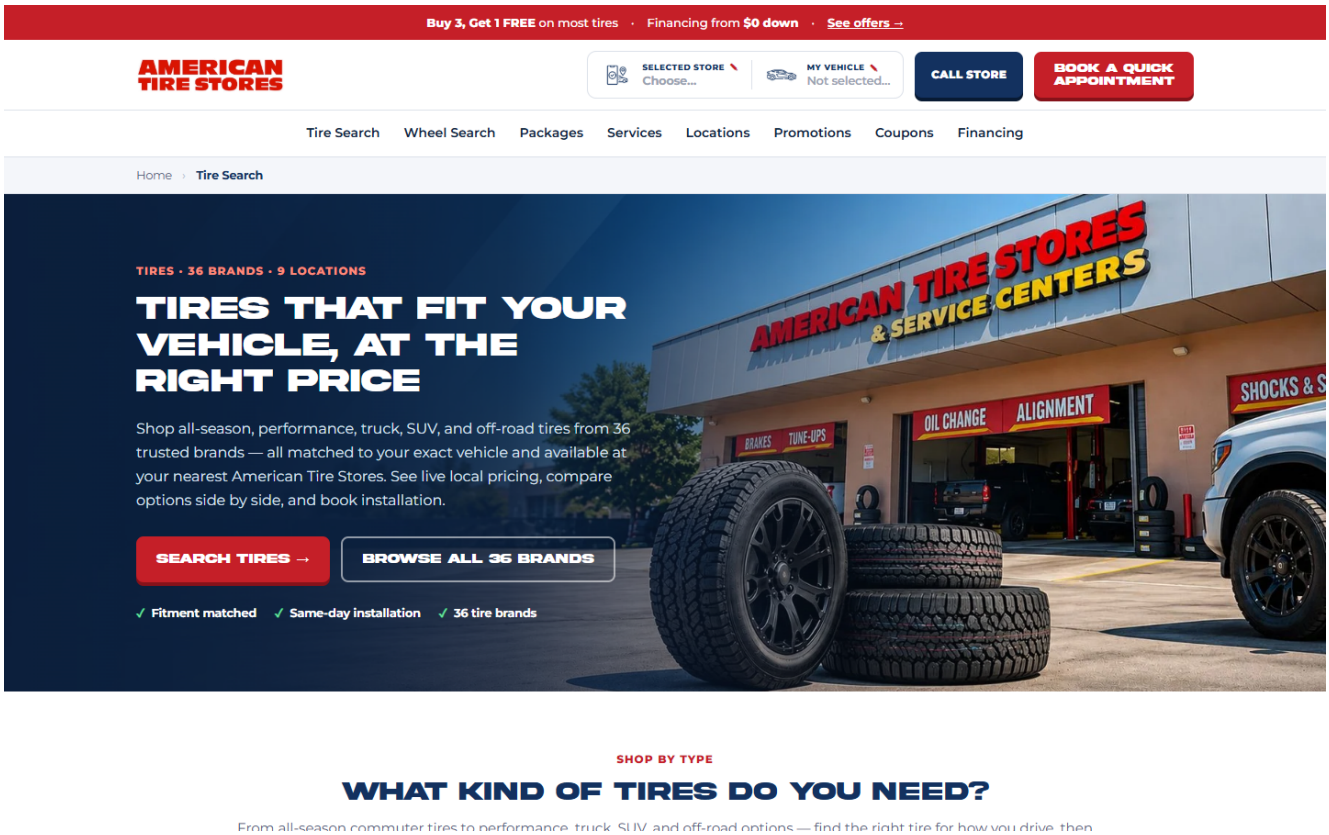

SHOP BY TYPE

WHAT KIND OF TIRES DO YOU NEED?

From all-season commuter tires to performance, truck, SUV, and off-road options — find the right tire for how you drive, then

QA page 9: Tire Search cleanup	Complete
Internal verification and obsolete template-note copy are hidden or removed from the storefront.	Post-fix screenshot below

WHAT KIND OF TIRES DO YOU NEED?

From all-season commuter tires to performance, truck, SUV, and off-road options — find the right tire for how you drive, then

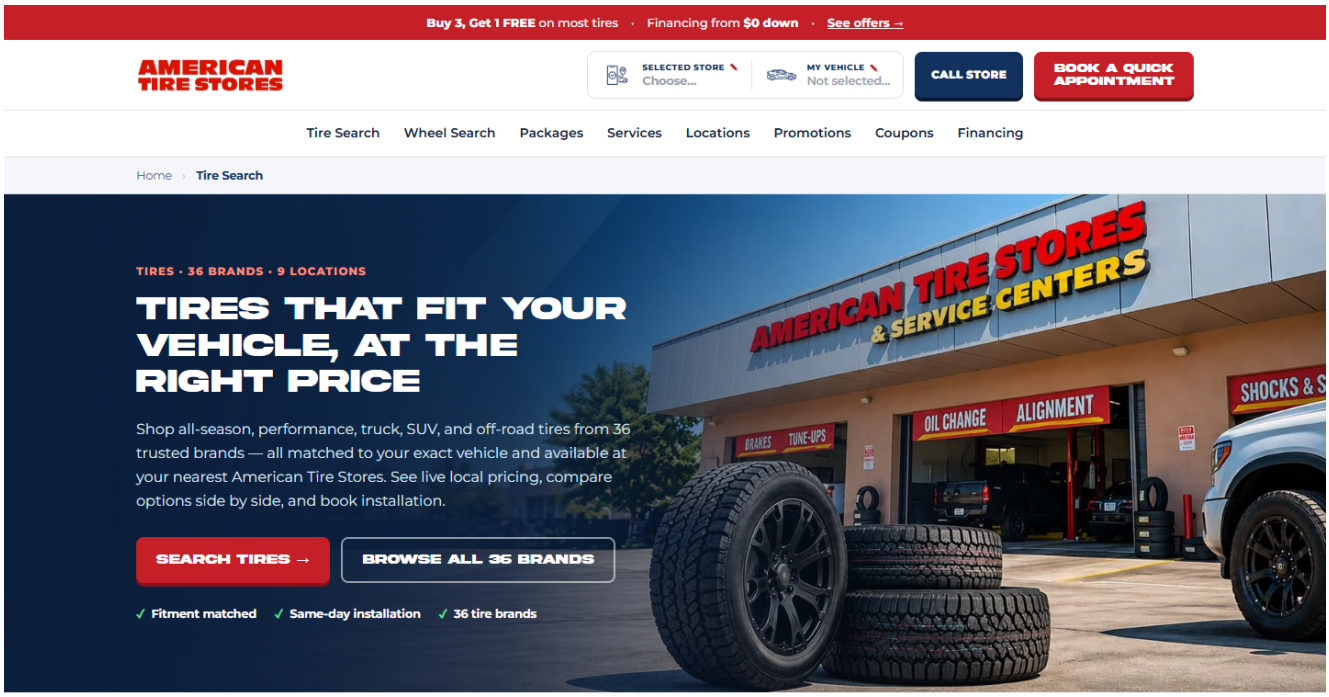

QA page 10: Tire reviews mobile	Complete
Responsive rules keep review cards within the available mobile column.	Post-fix screenshot below

Post-fix capture - Tire Search Mobile

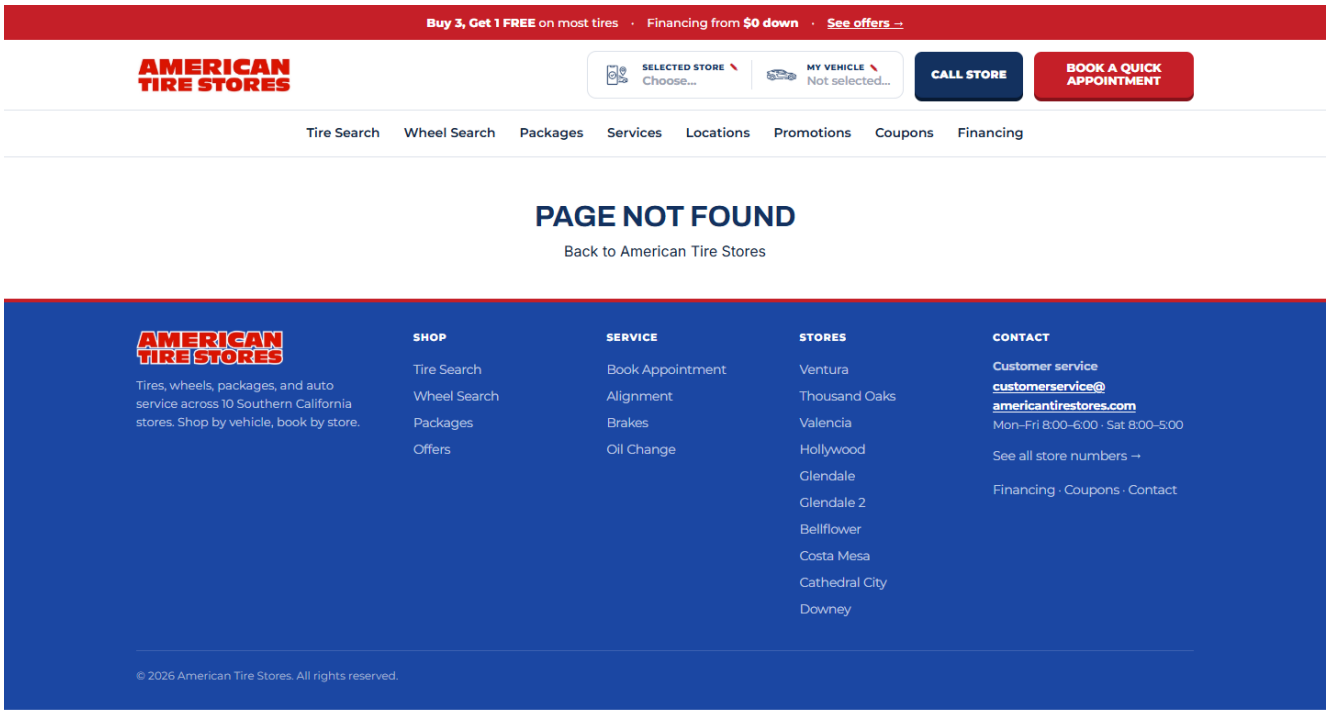

QA page 11: Related search link	Complete
Related Wheel Search actions use the wheel-search page route.	Post-fix screenshot below

Post-fix capture - Tire Search Desktop

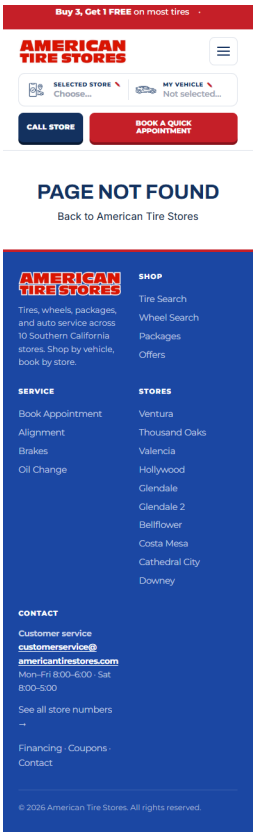

QA page 12: Wheel Search state	Complete
Wheel search remains wheel-configured and uses a neutral store-selection prompt rather than internal wording.	Post-fix screenshot below

Post-fix capture - Wheel Search Desktop

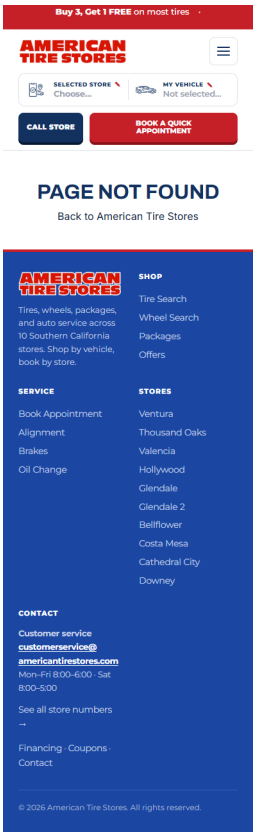

QA page 13: Wheel mobile layout	Complete
Shared responsive grid rules prevent horizontal clipping in wheel-page content.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

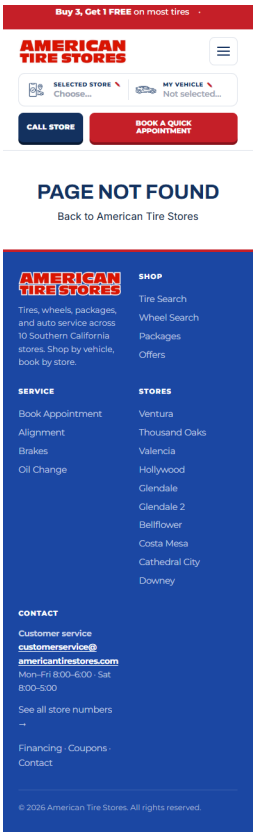

QA page 14: Wheel brand section	Complete
Brand rail uses responsive cards and controls across desktop and mobile widths.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

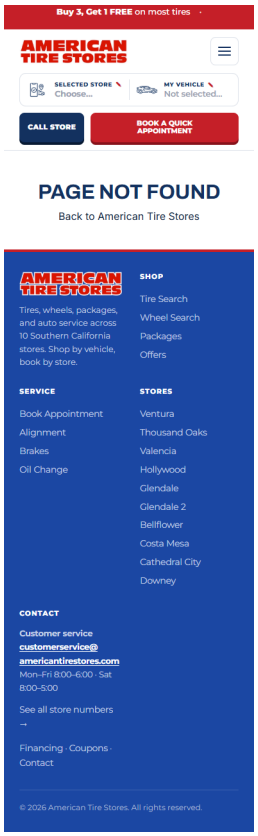

QA page 15: Wheel brand carousel	Complete
Carousel controls and progress presentation remain inside the viewport at narrow widths.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

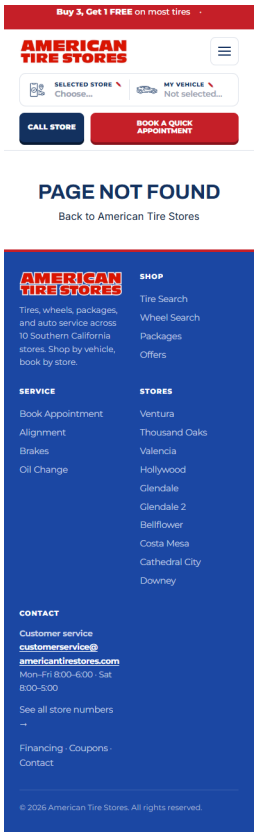

QA page 16: Wheel reviews	Complete
Review-card responsive layout was aligned with the standard mobile grid.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

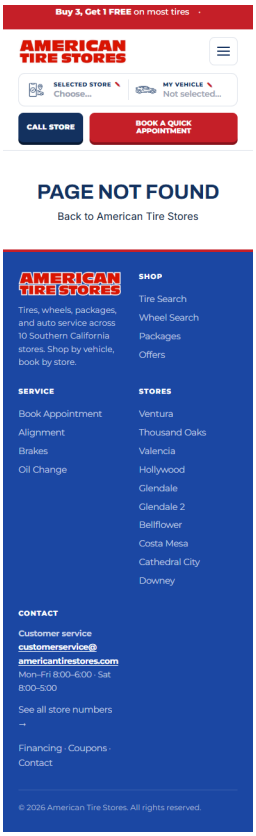

QA page 17: Wheel testimonial layout	Complete
Testimonial cards use the common narrow-screen column behaviour.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

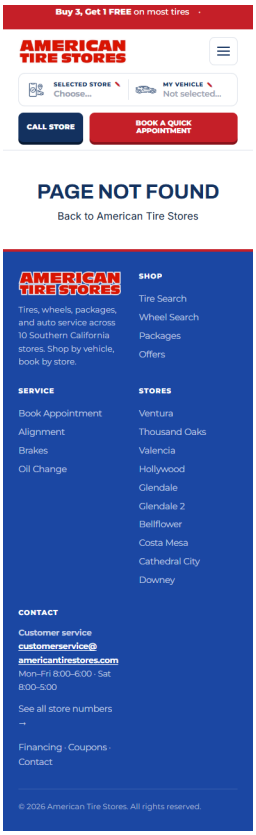

QA page 18: Wheel mobile cards	Complete
Third-card mobile alignment follows the responsive grid instead of overflowing.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

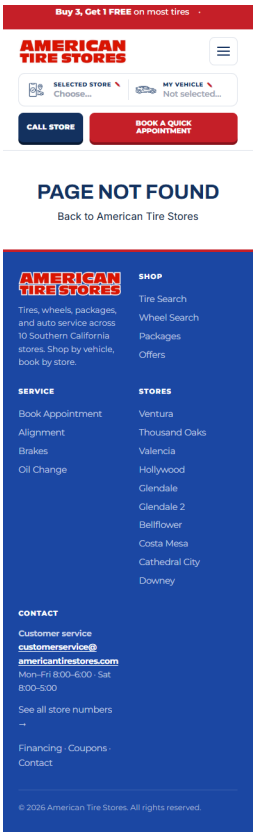

QA page 19: Wheel locations grid	Complete
The shared location-grid augmentation adds Downey without changing Signal Hill's Coming Soon state.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

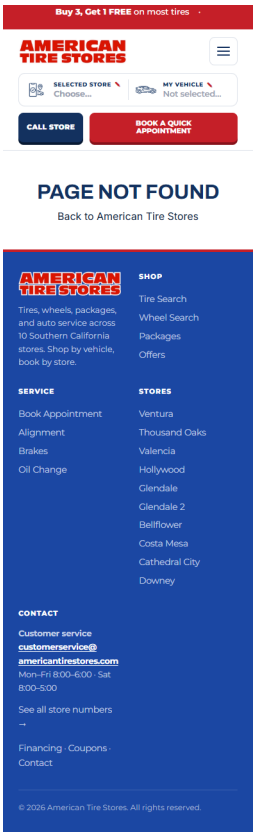

QA page 20: Wheel location links	Complete
Location card actions point to store detail pages.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

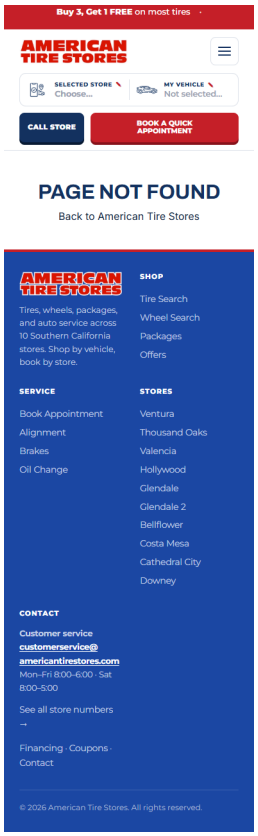

QA page 21: Wheel popular content	Complete
Narrow-screen spacing and card wrapping use the shared responsive rules.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

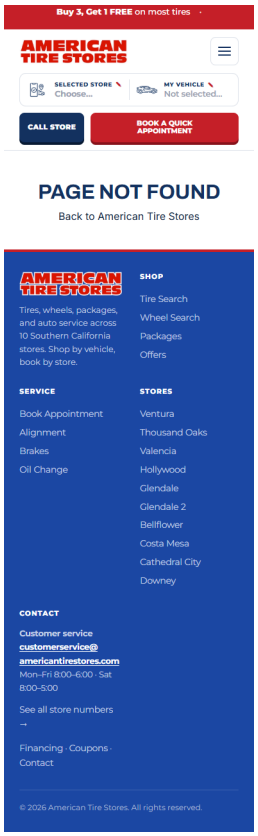

QA page 22: Wheel content spacing	Complete
Section spacing is constrained to avoid mobile clipping.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

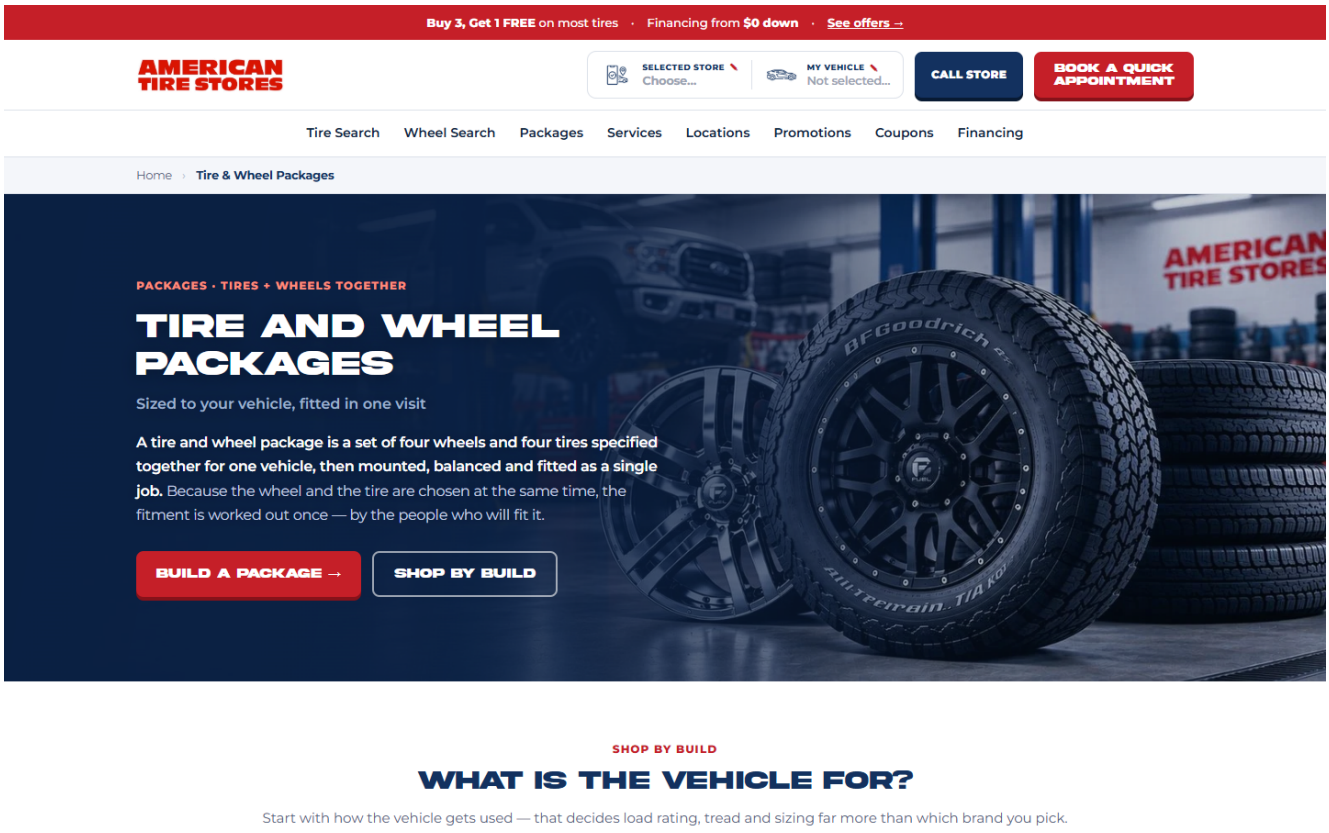

QA page 23: Wheel lower content	Complete
Location and related-page layouts share the same responsive card handling.	Post-fix screenshot below

Post-fix capture - Wheel Search Mobile

QA page 24: Package build cards	Complete
Package cards retain working TireConnect entry points and no longer expose developer implementation notes.	Post-fix screenshot below

Post-fix capture - Packages Desktop

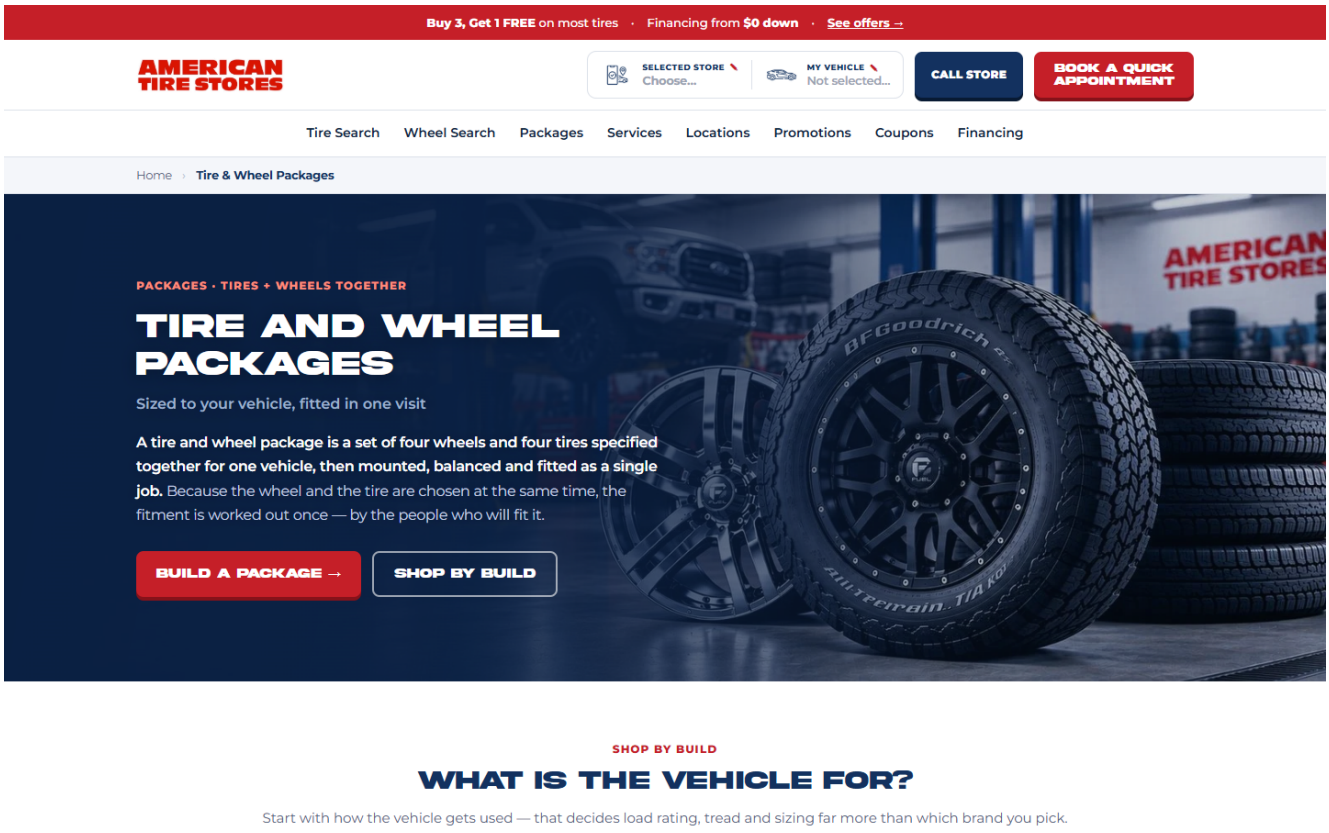

SHOP BY BUILD

WHAT IS THE VEHICLE FOR?

Start with how the vehicle gets used — that decides load rating, tread and sizing far more than which brand you pick.

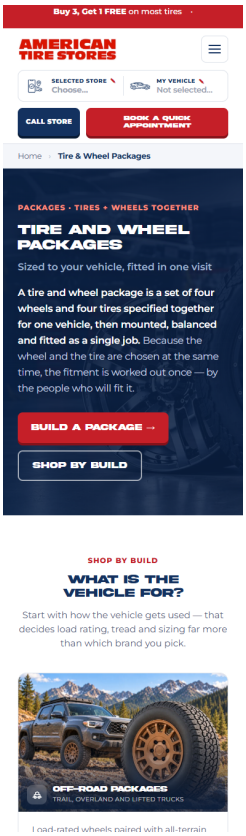

QA page 25: Package search tab	Complete
Package page remains configured for package products and removes stray template/developer UI.	Post-fix screenshot below

Post-fix capture - Packages Desktop

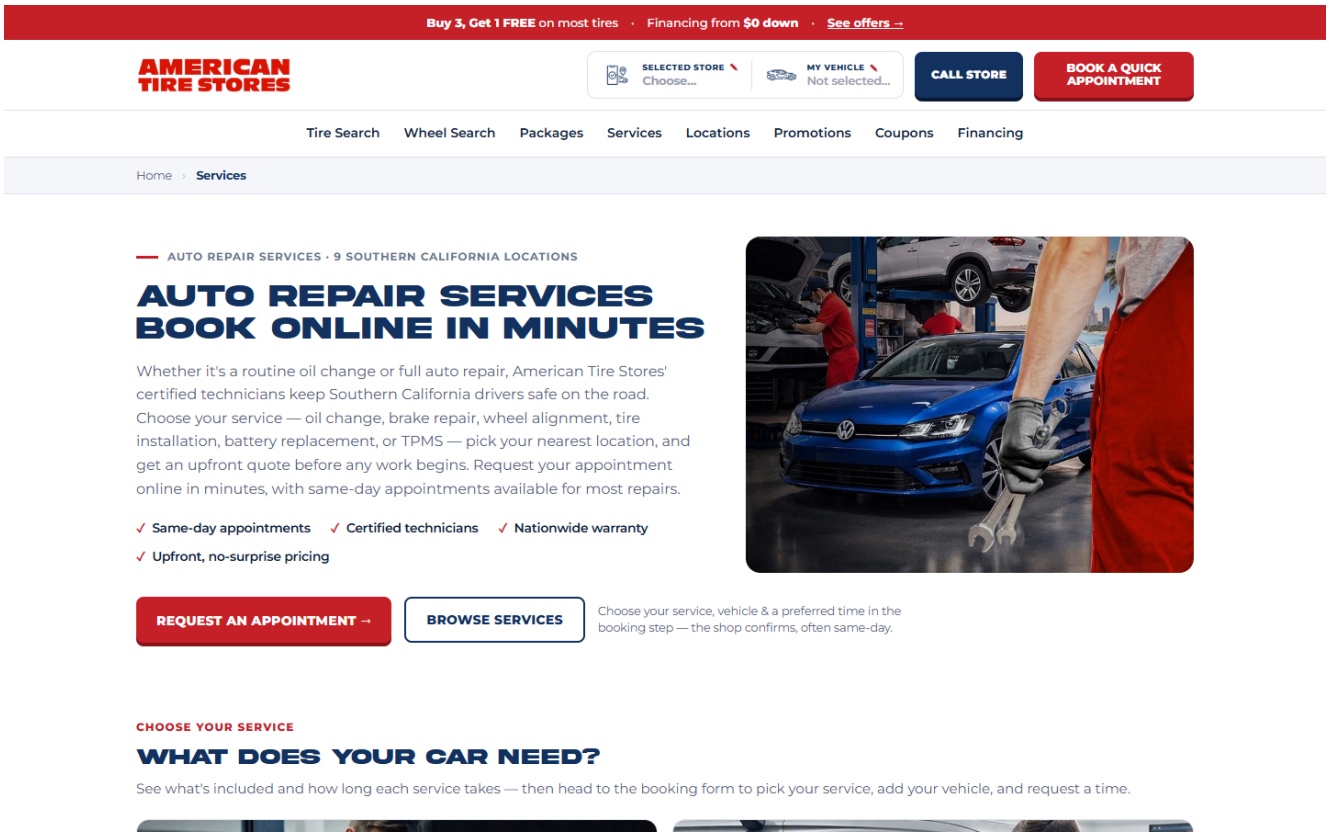

QA page 26: Package information	Complete
Package information uses the normal responsive grid rather than internal placeholder content.	Post-fix screenshot below

Post-fix capture - Packages Mobile

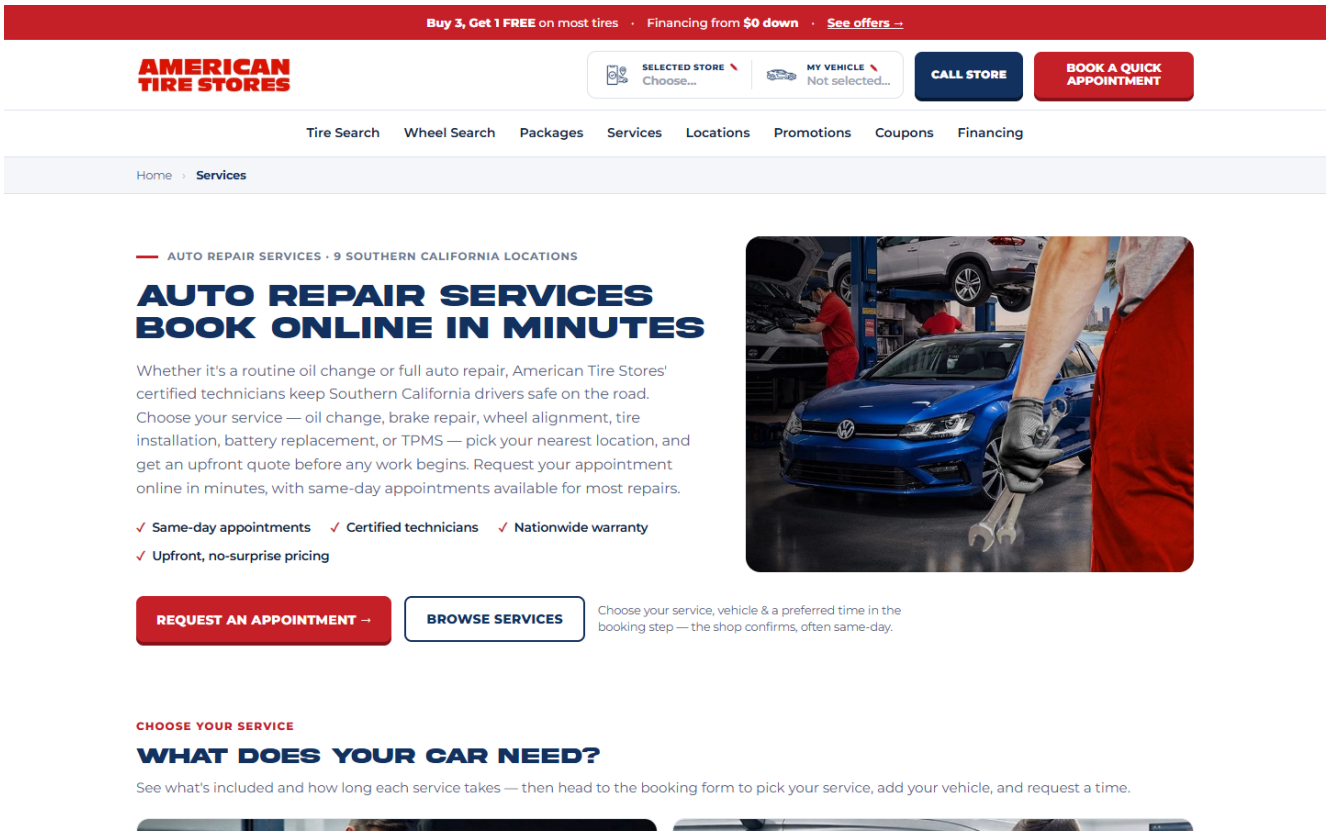

QA page 27: Service link	Complete
Service cards link to their individual service pages, including their images.	Post-fix screenshot below

Post-fix capture - Services Desktop

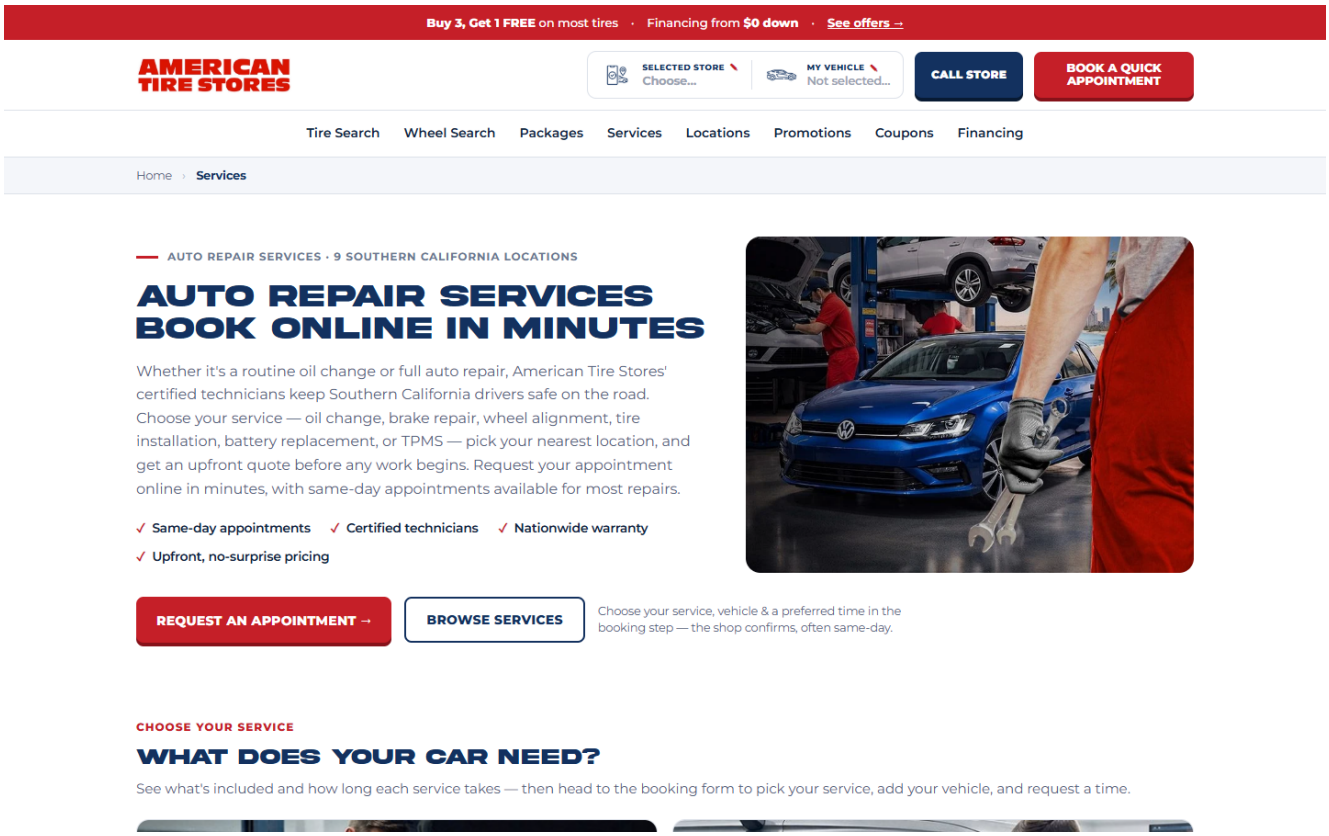

QA page 28: New store visibility	Complete
Downey is visible in customer-facing grids as an active store; it is intentionally excluded from live TireConnect selectors pending an ID.	Post-fix screenshot below

Post-fix capture - Services Desktop

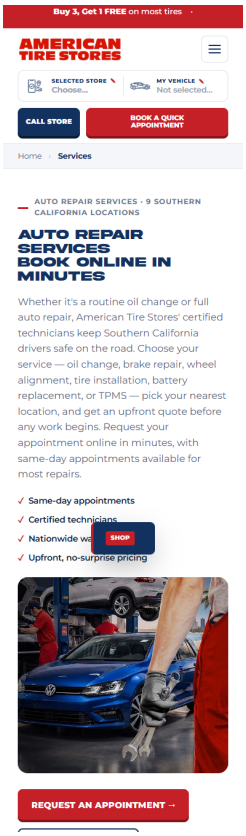

QA page 29: Location responsive cards	Complete
Location cards use standard responsive columns and store-detail destinations.	Post-fix screenshot below

Post-fix capture - Services Desktop

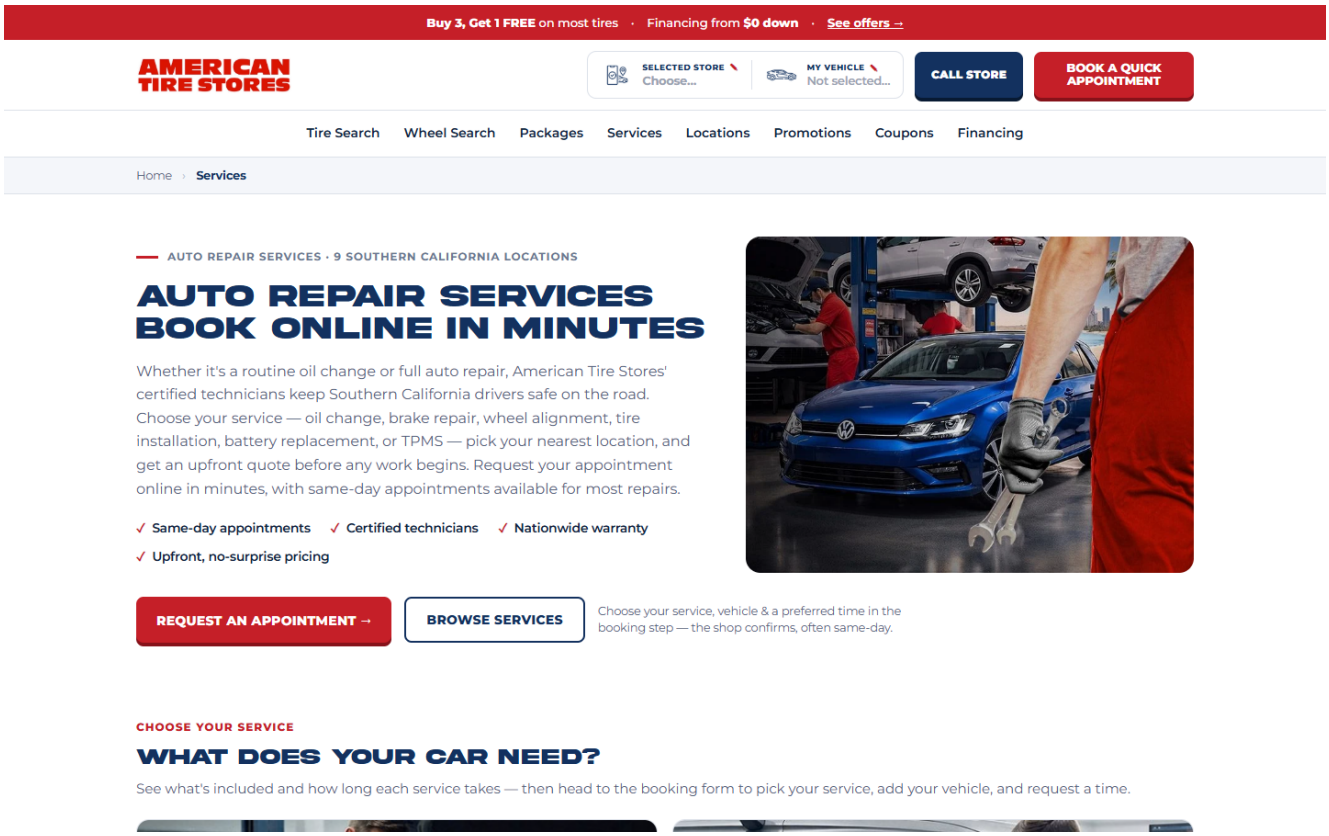

QA page 30: Services mobile hero	Complete
Service hero controls and bullets use the shared narrow-screen layout without overlap.	Post-fix screenshot below

Post-fix capture - Services Mobile

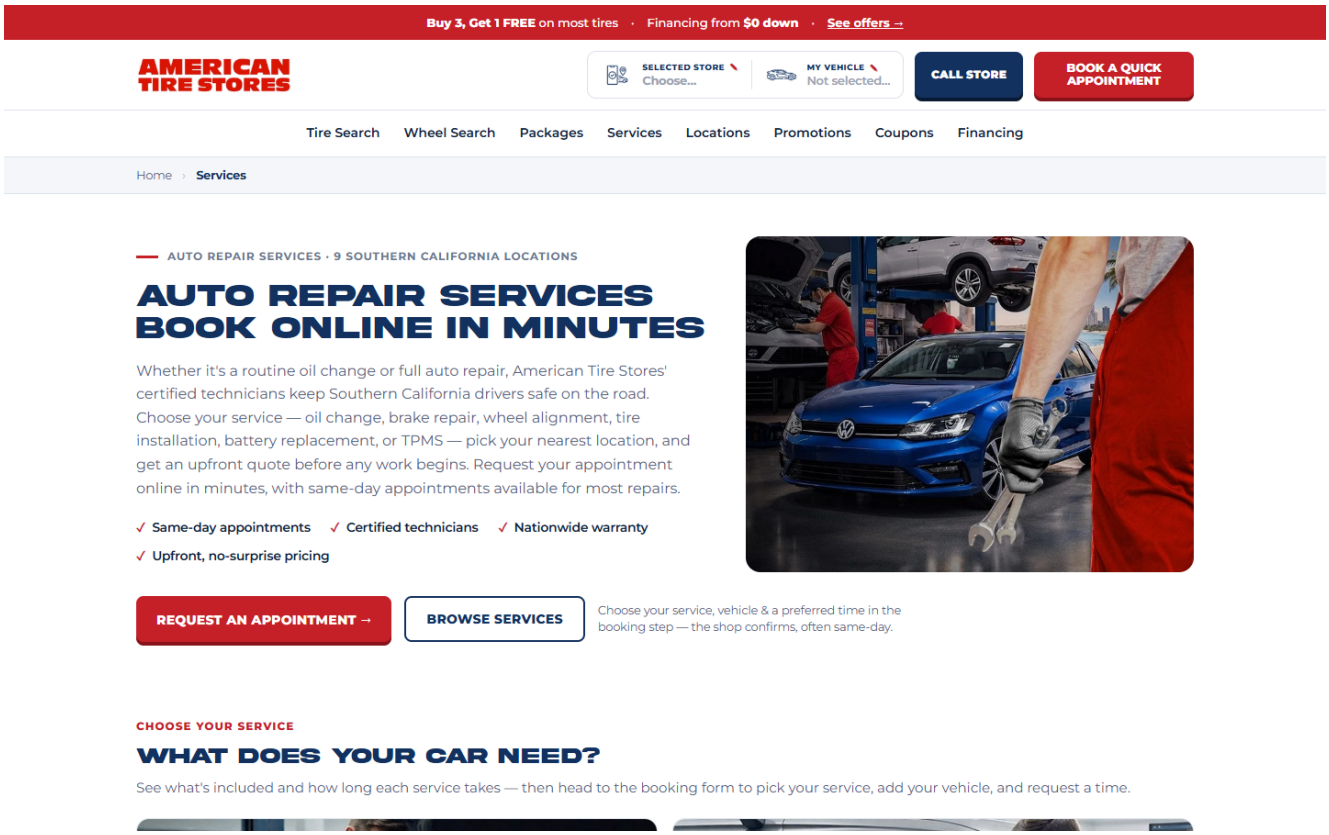

QA page 31: Location mobile sticky UI	Complete
The broken location sticky action rail was removed.	Post-fix screenshot below

Post-fix capture - Services Desktop

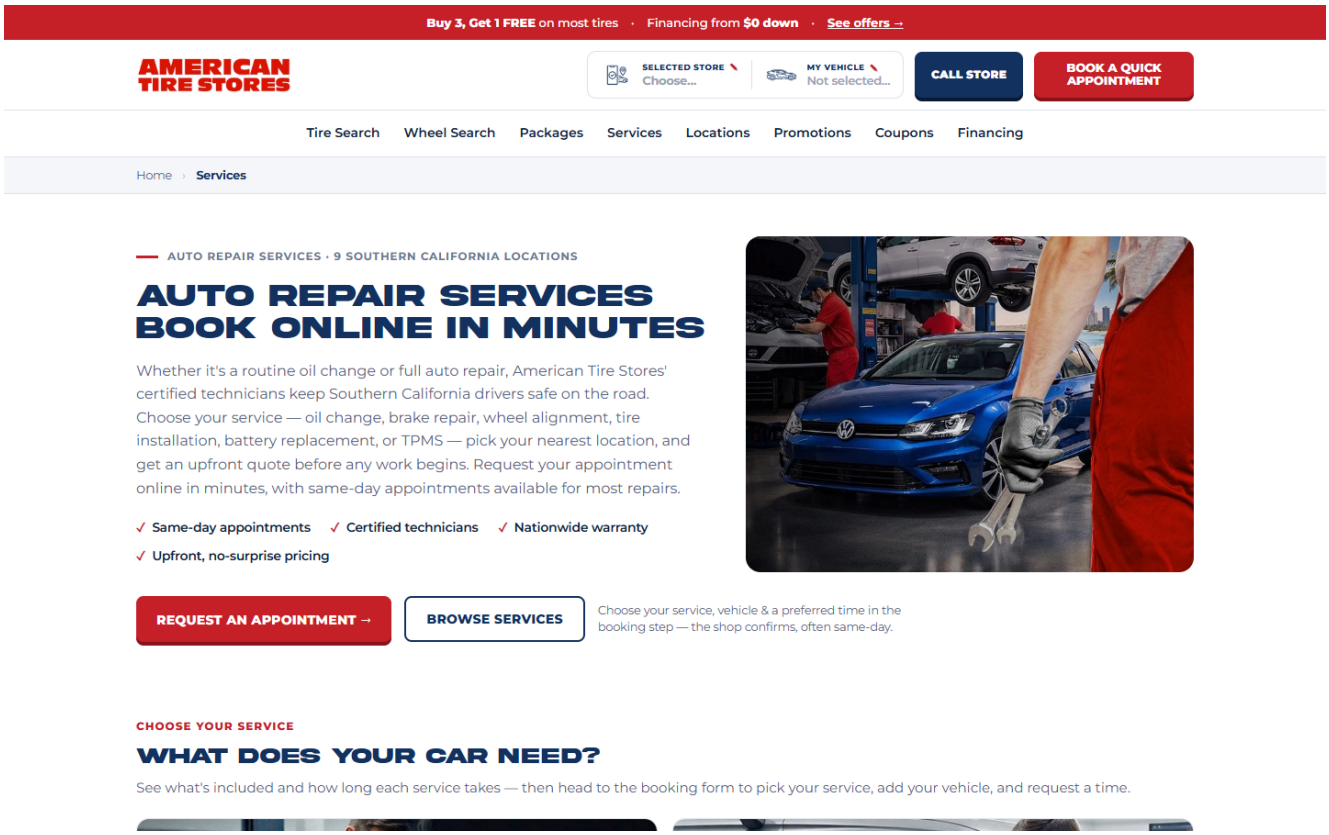

QA page 32: Service detail headers	Complete
All service-detail URLs receive a consistent Home / Services / Service details breadcrumb below the main header.	Post-fix screenshot below

Post-fix capture - Services Desktop

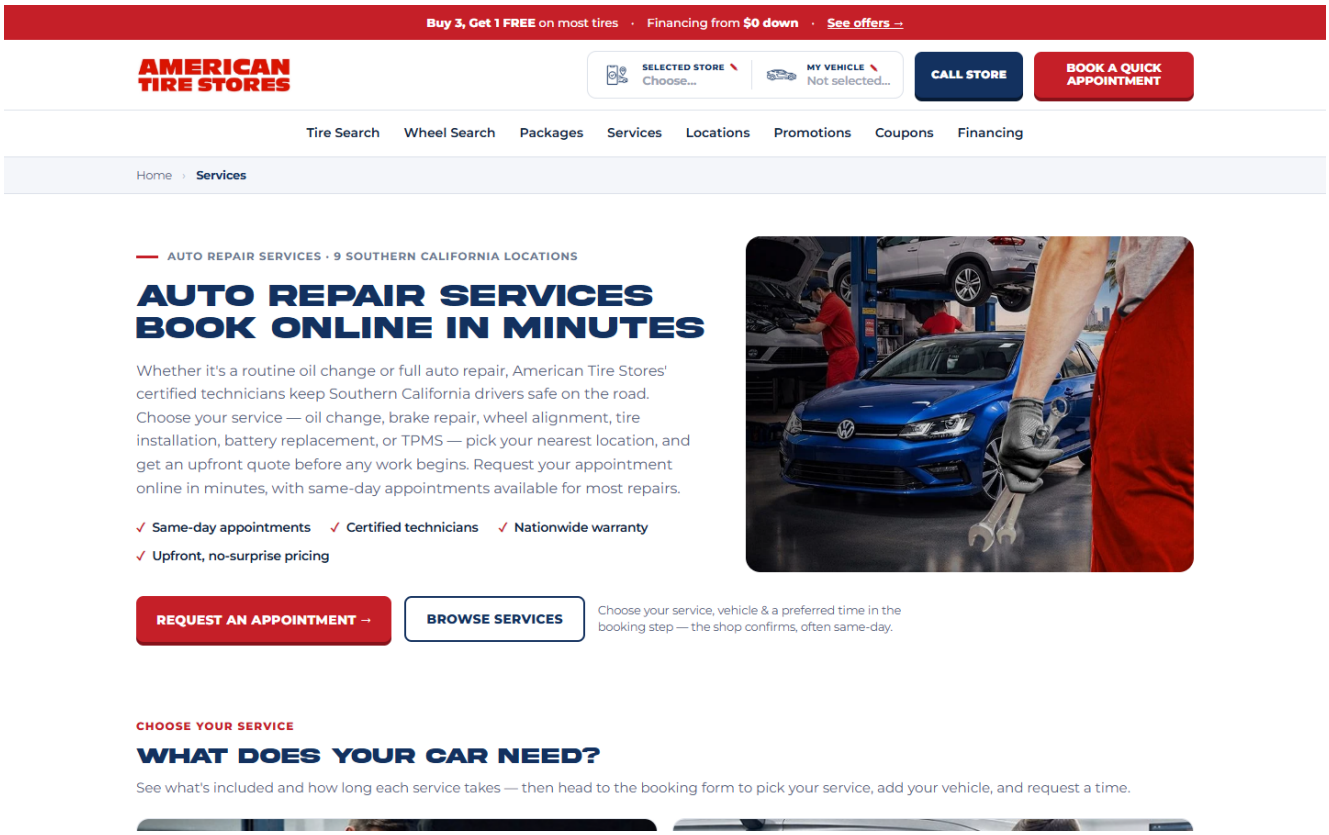

QA page 33: Service journey	Complete
Service journey and booking sections keep their normal card layout rather than exposing internal copy.	Post-fix screenshot below

Post-fix capture - Services Desktop

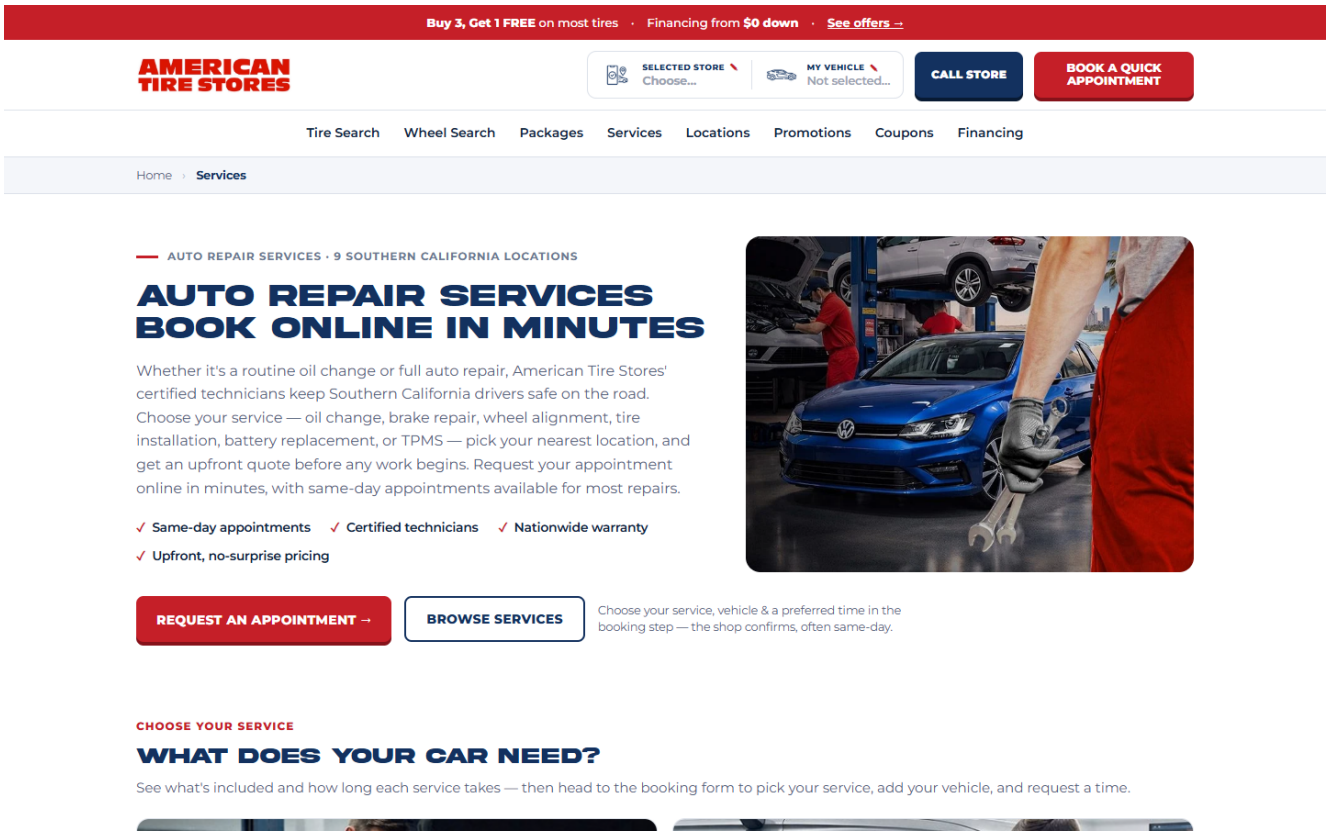

QA page 34: Service breadcrumb	Complete
A shared generated breadcrumb fixes the missing/misaligned service-detail breadcrumb placement.	Post-fix screenshot below

Post-fix capture - Services Desktop

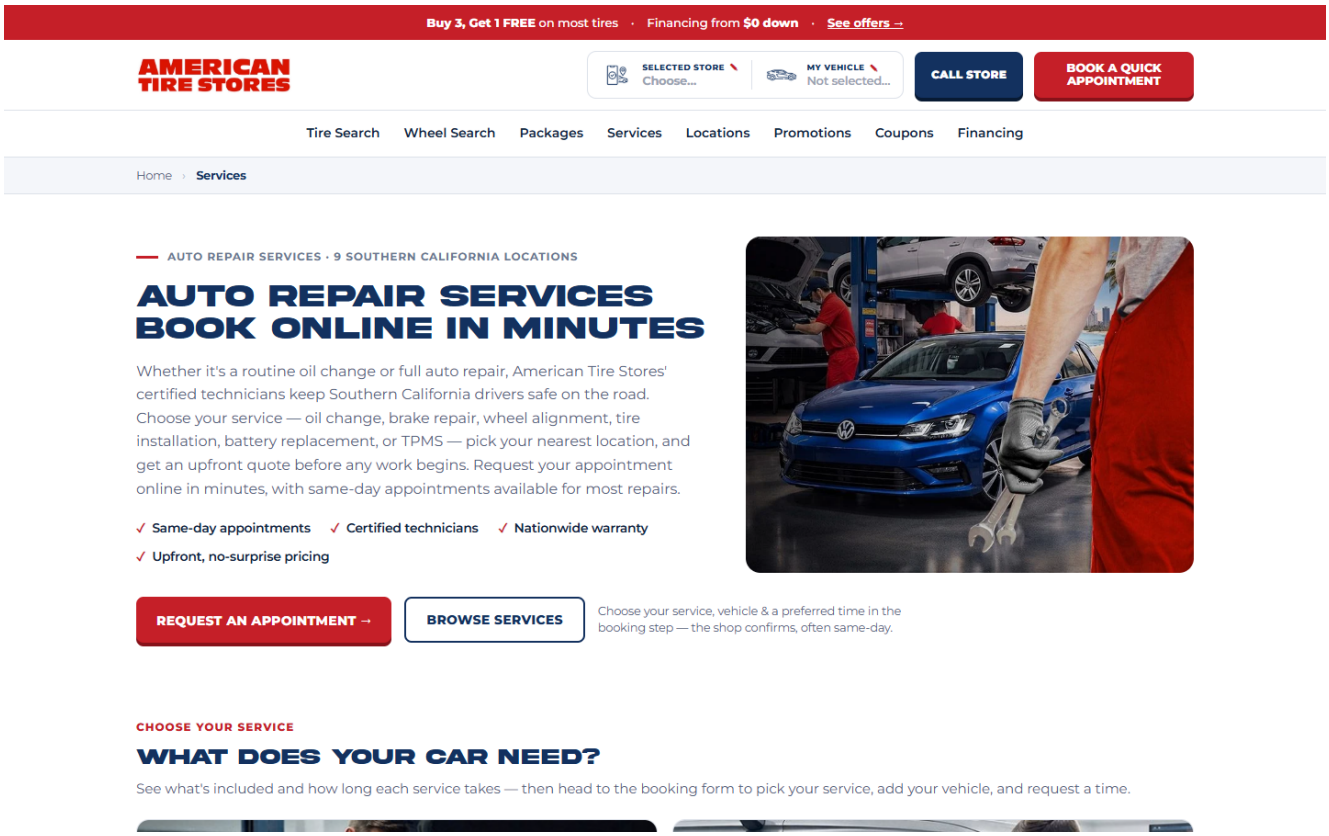

QA page 35: Booking preselection	Complete
Services restore selected-store and vehicle data from shared TireConnect state when the widget becomes available.	Post-fix screenshot below

Post-fix capture - Services Desktop

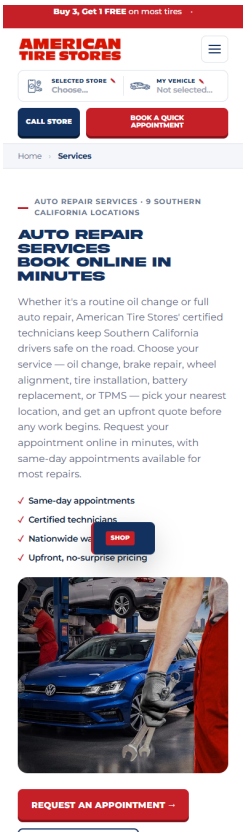

QA page 36: Service locations	Complete
Services location grids are augmented with the Downey store detail card.	Post-fix screenshot below

Post-fix capture - Services Desktop

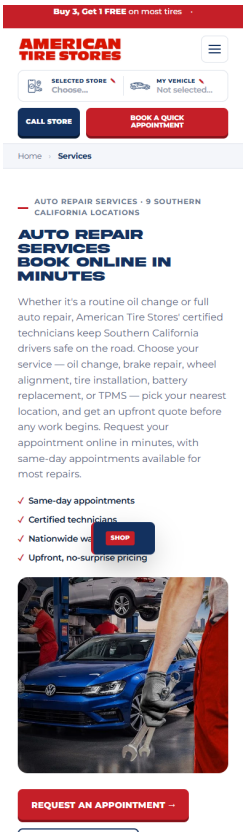

QA page 37: Service mobile hierarchy	Complete
Common responsive CSS keeps hero content, CTA, and imagery in a safe order on mobile.	Post-fix screenshot below

Post-fix capture - Services Mobile

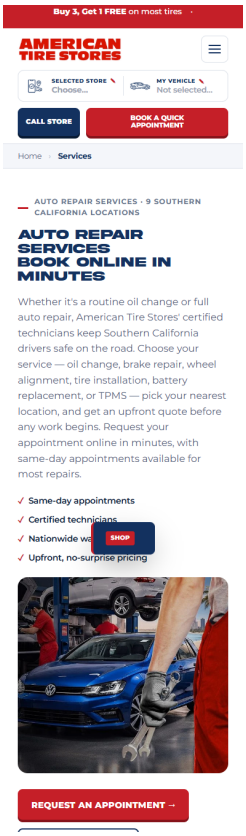

QA page 38: Service mobile breadcrumb	Complete
Breadcrumb spacing is responsive and sits below the site header.	Post-fix screenshot below

Post-fix capture - Services Mobile

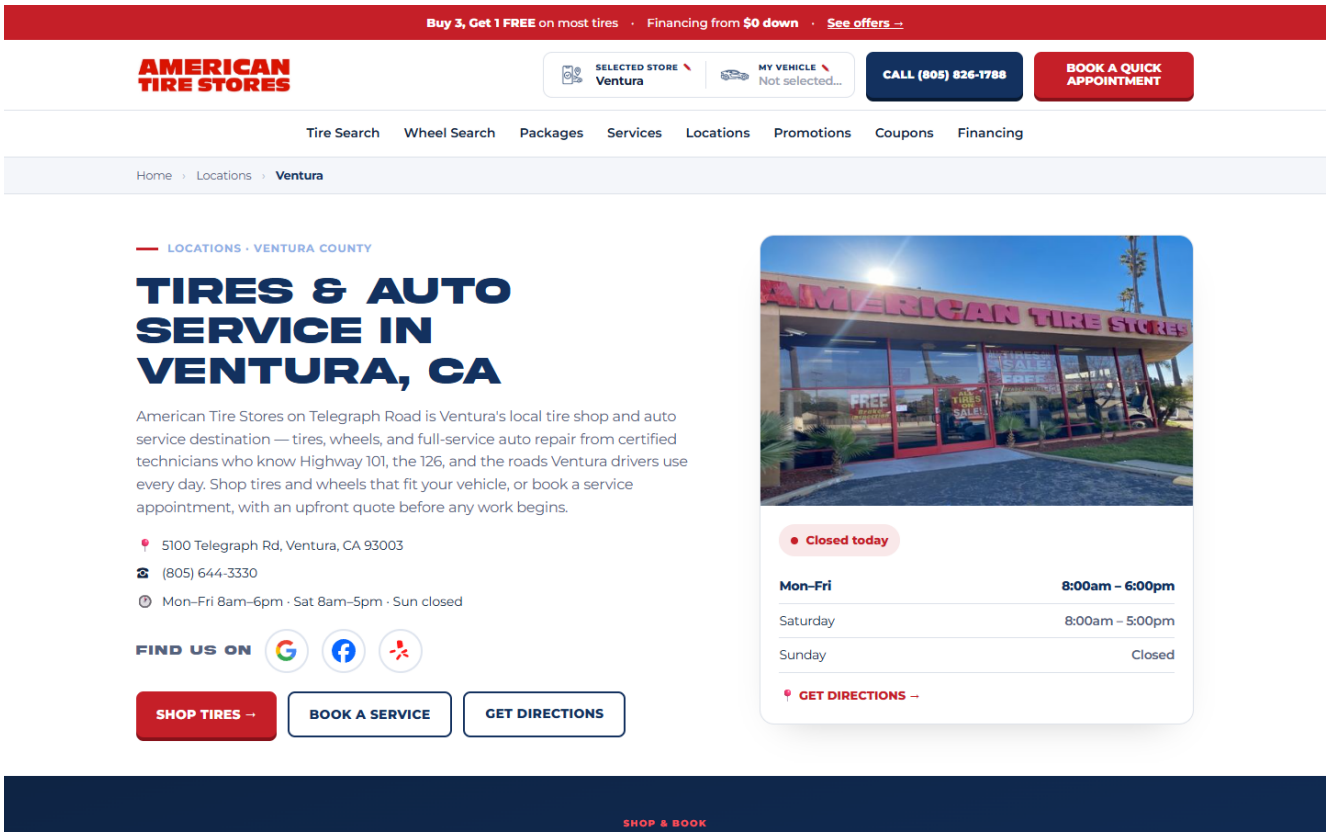

QA page 39: Service hero image	Complete
Responsive layout applies the expected image/card behaviour across service detail pages.	Post-fix screenshot below

Post-fix capture - Services Mobile

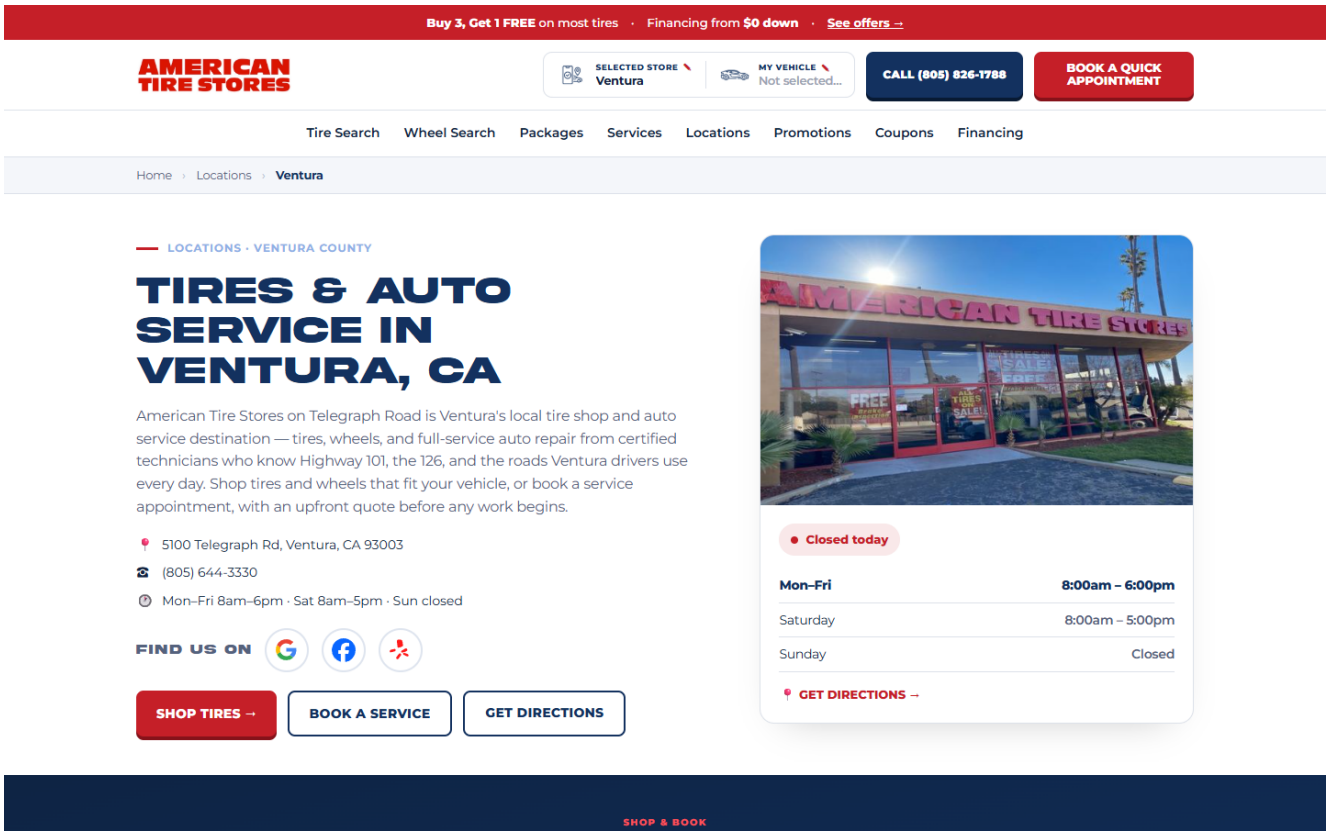

QA page 40: Location hero controls	Complete
All active location pages use the shared data-driven hero and CTA implementation.	Post-fix screenshot below

Post-fix capture - Ventura Desktop

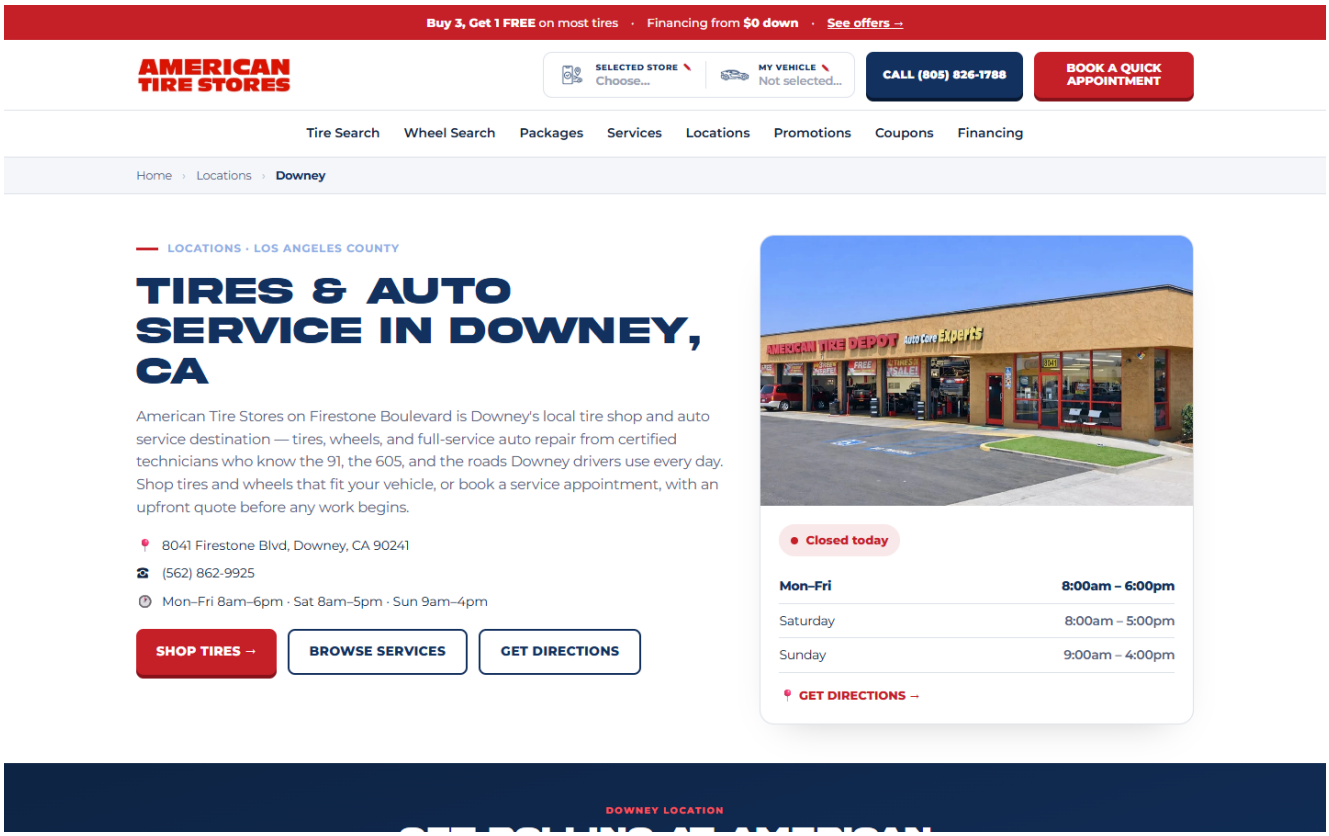

QA page 41: Location links/modules	Complete
Location-detail routing is unified and obsolete location modules were removed from the shared template.	Post-fix screenshot below

Post-fix capture - Ventura Desktop

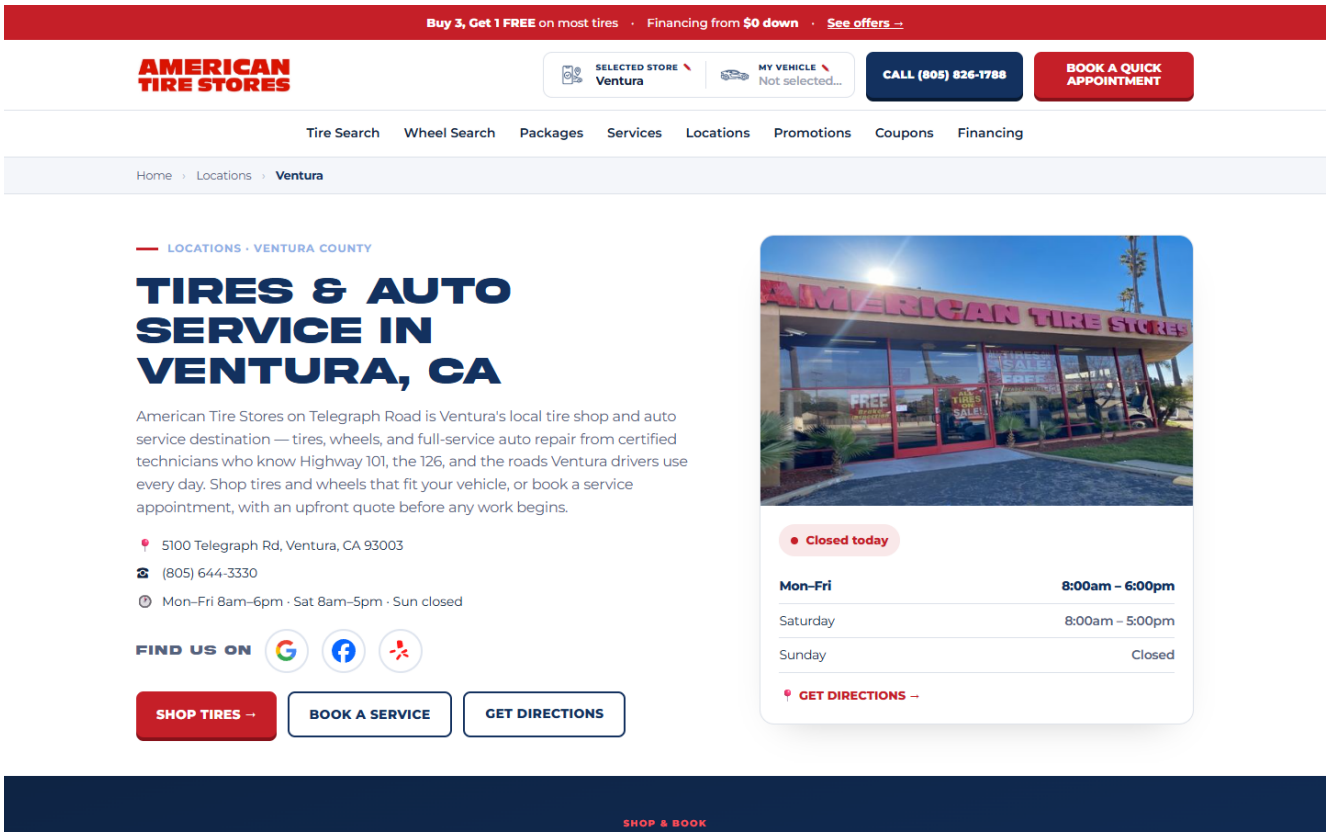

QA page 42: Offer tire CTA	Complete
Tire actions route to Tire Search and its persistent TireConnect experience.	Post-fix screenshot below

Post-fix capture - Downey Desktop

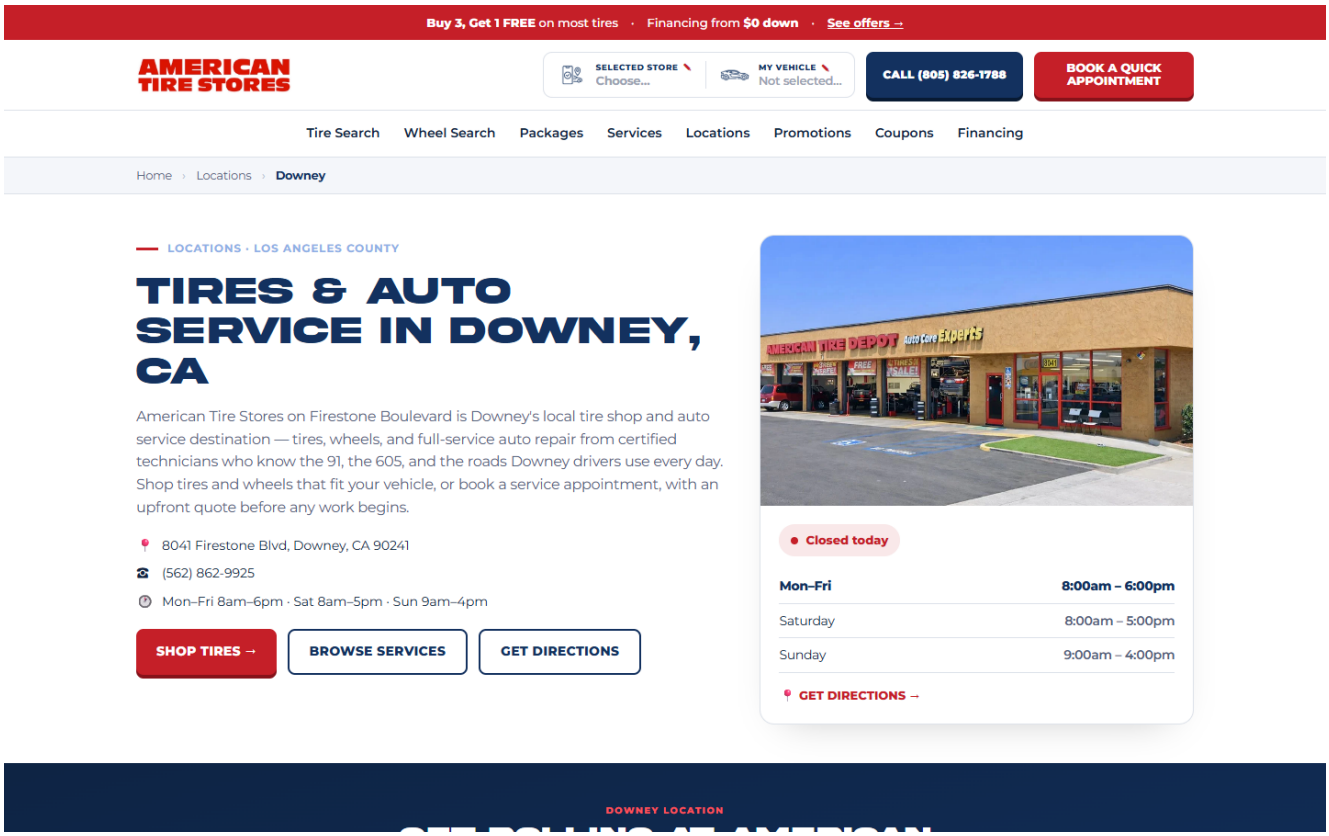

QA page 43: Location FAQ	Complete
Shared location FAQs use native details/summary controls and remain keyboard accessible.	Post-fix screenshot below

Post-fix capture - Ventura Desktop

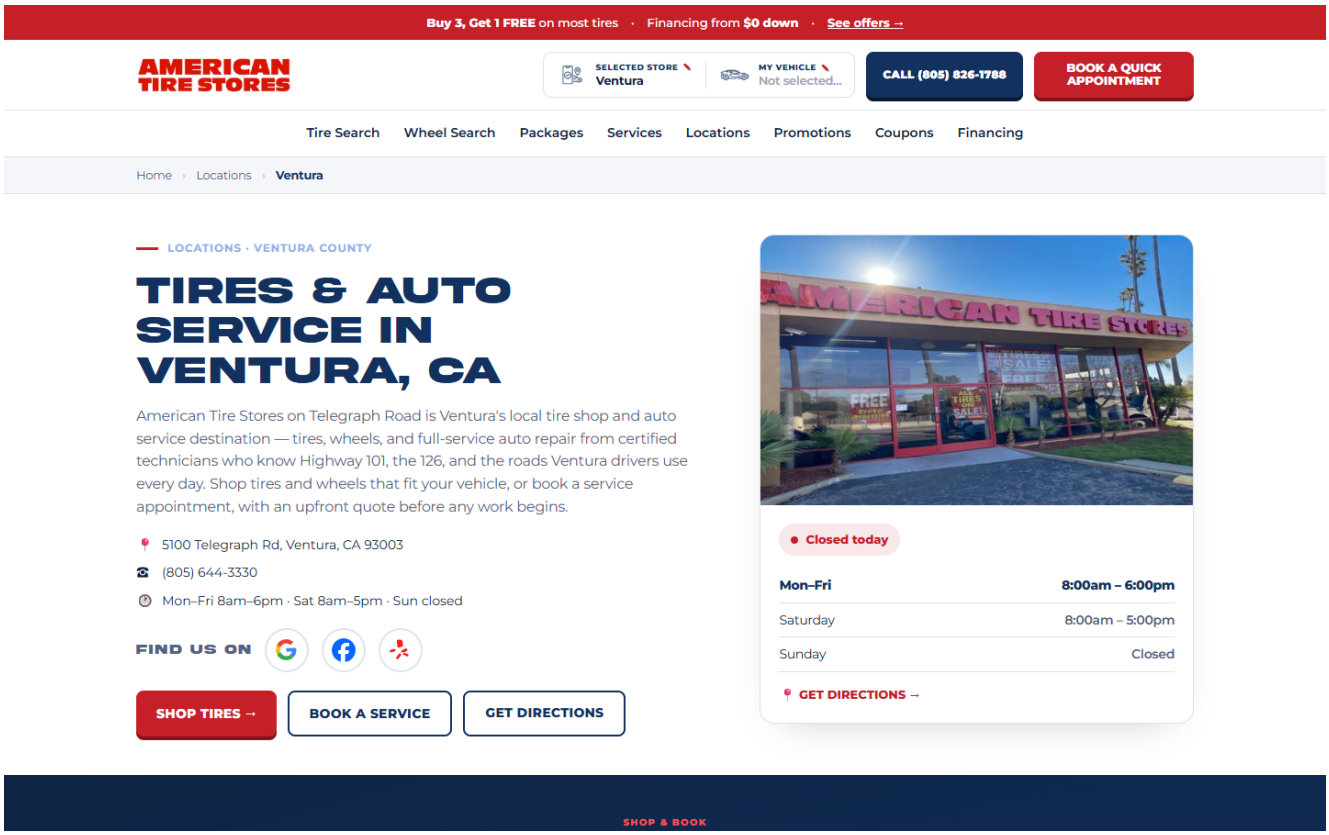

QA page 44: Closing CTA	Complete
Closing actions use working Services and Tire Search routes without an invalid location ID.	Post-fix screenshot below

Post-fix capture - Downey Desktop

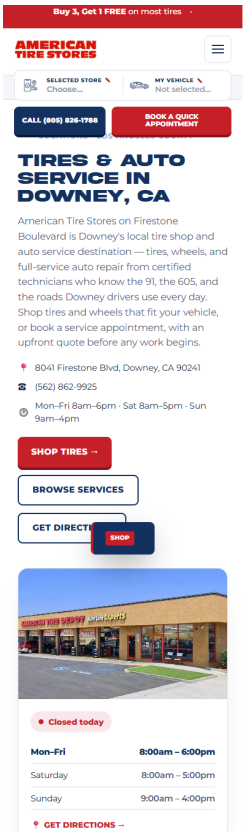

QA page 45: Store CTA design	Complete
Every active location uses Shop Tires, Call, Book a Service, and Get Directions in a two-by-two action grid.	Post-fix screenshot below

Post-fix capture - Ventura Desktop

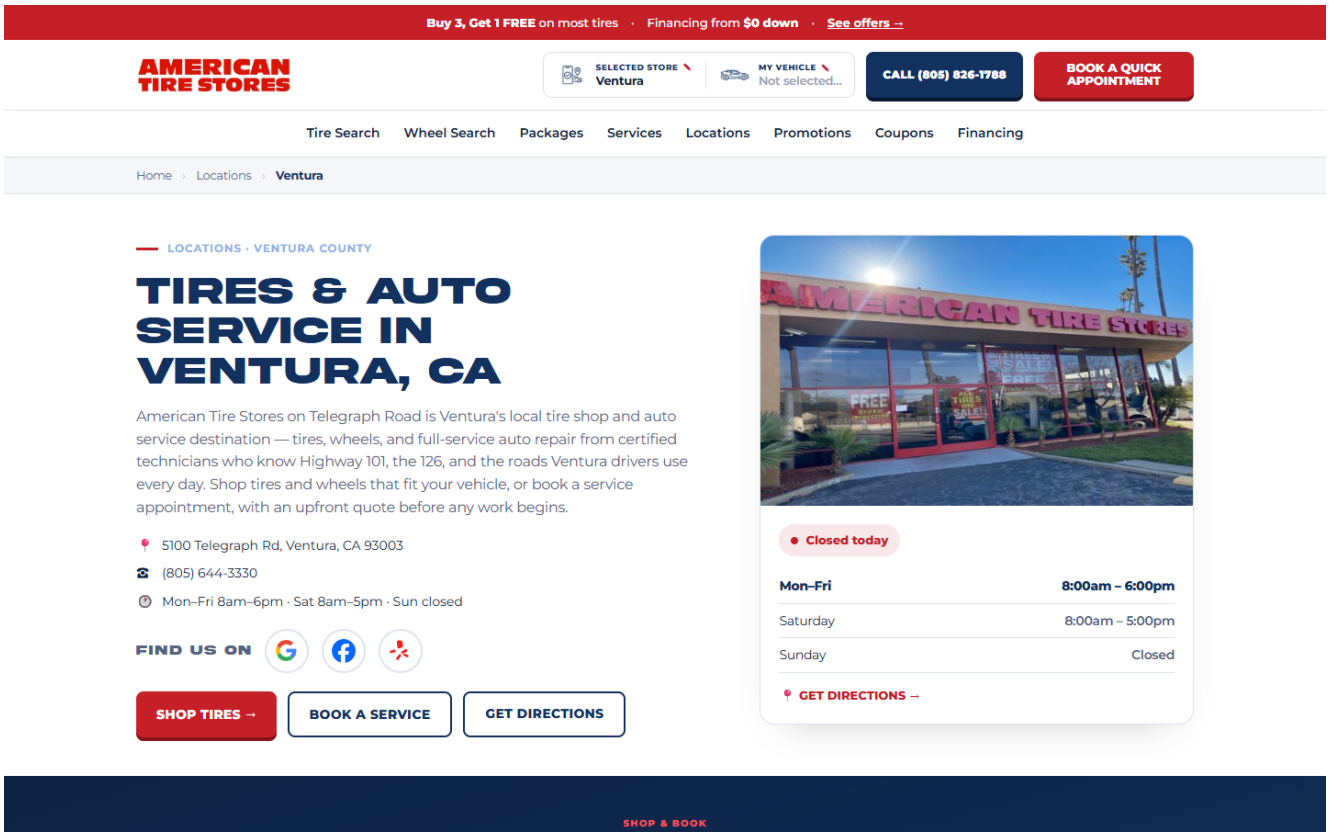

QA page 46: Store CTA mobile	Complete
The CTA grid stays two columns on mobile and avoids the removed sticky rail.	Post-fix screenshot below

Post-fix capture - Downey Mobile

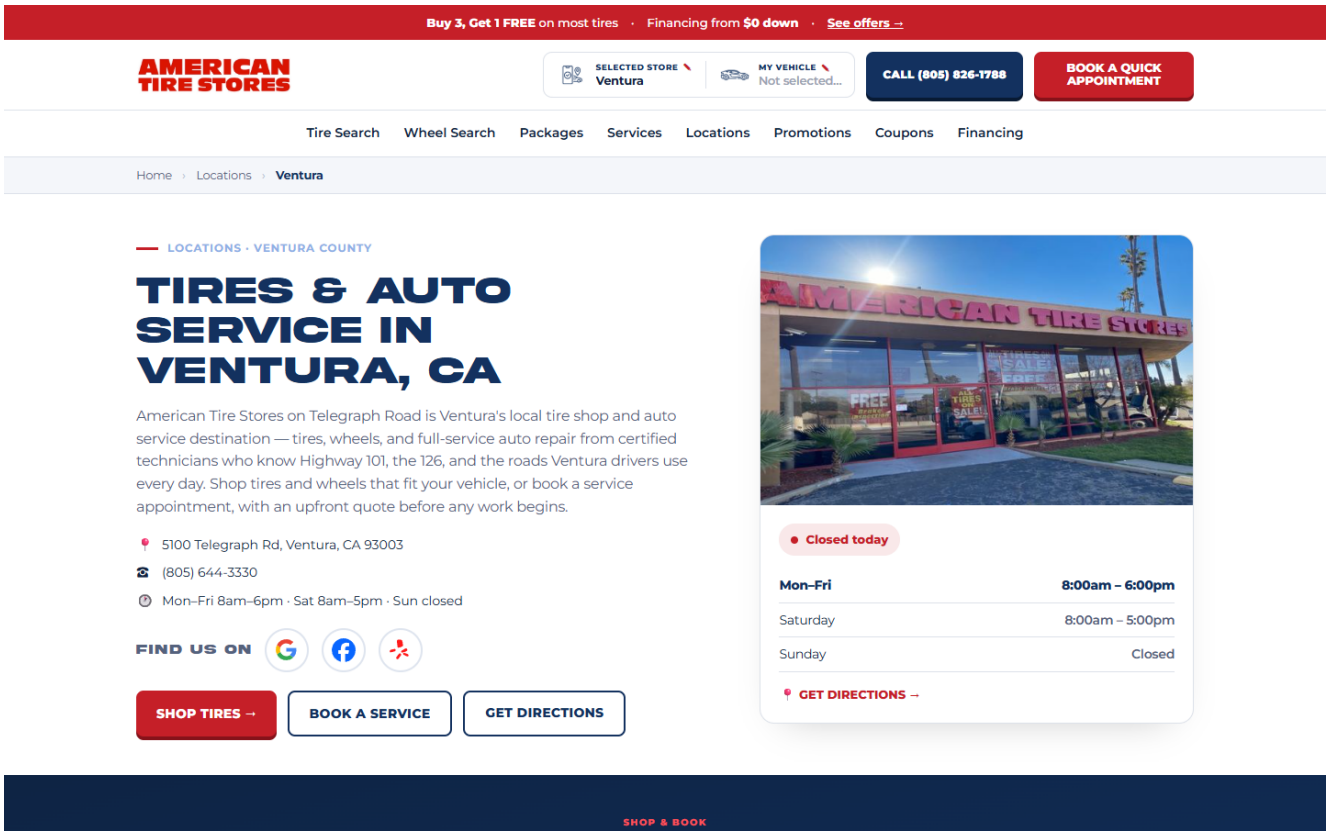

QA page 47: Other-store grid	Complete
Customer-facing grids include all ten active stores plus Signal Hill Coming Soon.	Post-fix screenshot below

Post-fix capture - Ventura Desktop

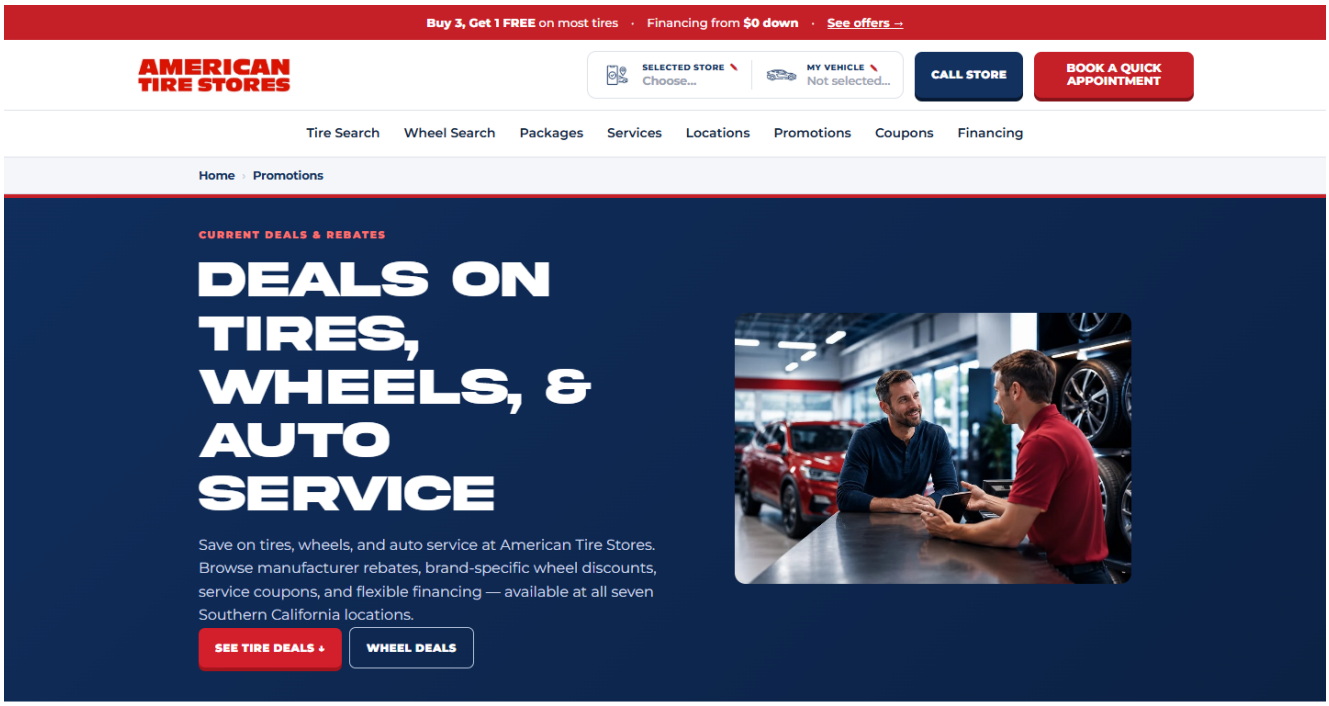

QA page 48: Internal labels	Complete
Visible DEV, VERIFY, Prototype, template-note, and Available at this location UI copy is removed or suppressed.	Post-fix screenshot below

Post-fix capture - Ventura Desktop

QA page 49: Promotion spacing	Complete
Promotion pages inherit shared footer and responsive spacing fixes.	Post-fix screenshot below

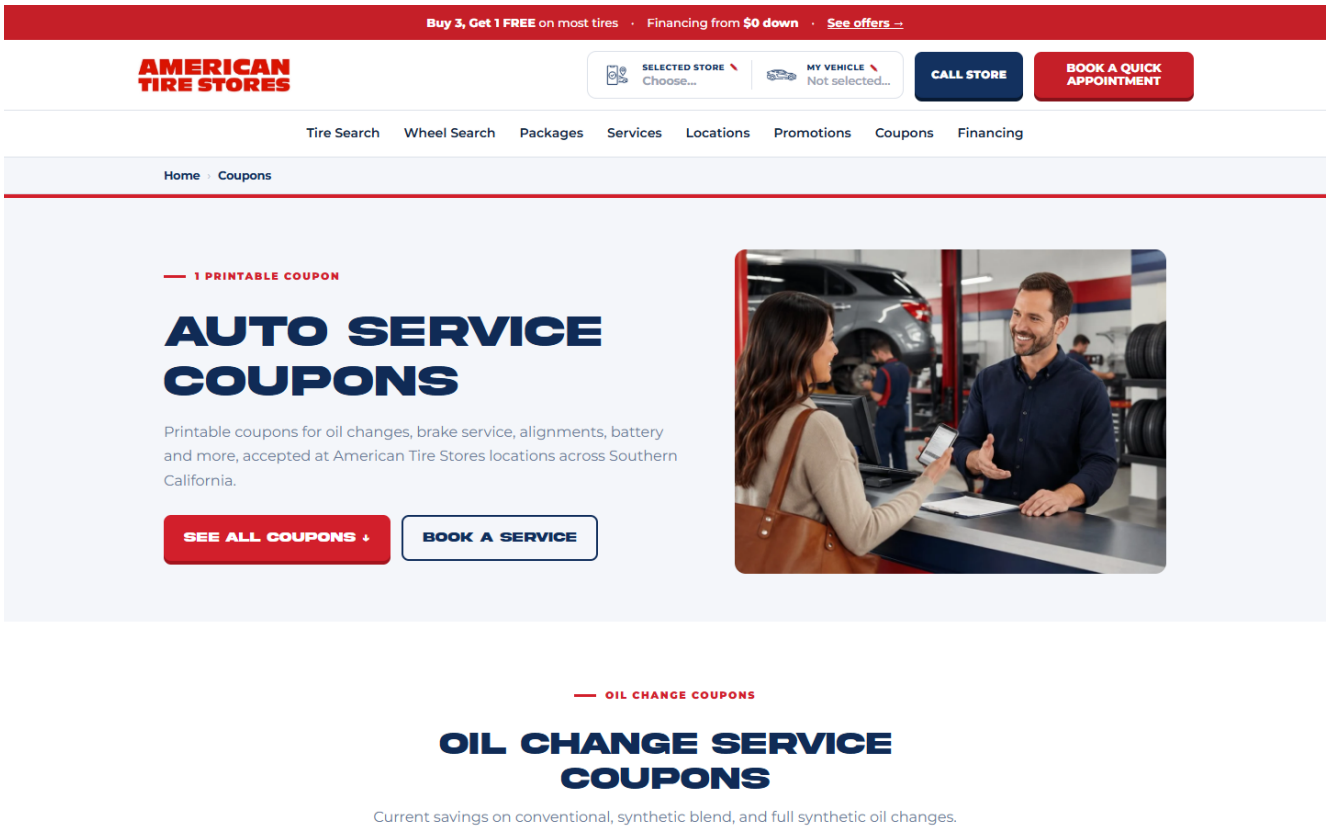

Post-fix capture - Promotions Desktop

QA page 50: Promotion/Coupon locations	Complete
Location-card collections receive Downey and retain the correct Signal Hill state.	Post-fix screenshot below

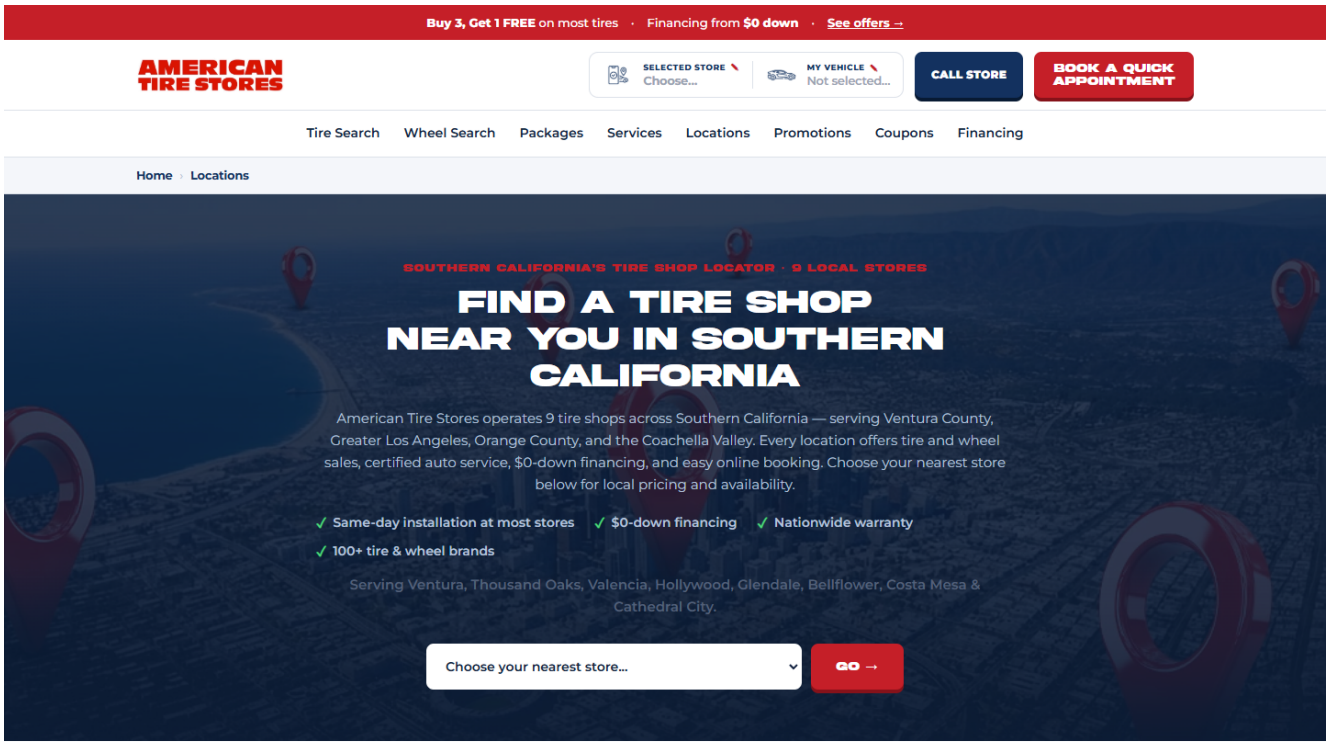

Post-fix capture - Coupons Desktop

QA page 51: Source closeout	N/A
The final source page contains no separate actionable issue.	Post-fix screenshot below

Post-fix capture - Locations Desktop
